Compendium Deluxe #1 Disk Archivers Menu

1.1 Disk Archivers

Filename	Comands	Size	Description
dmsg101b.lha	VX	62K	DMS Graphics User Interface V1.0Beta by Arnold Wittenberg - This was written because DMSwin had no verify option, DMSwindow was too slow, and I hate key pressing and text reading DMSfiles. So try out my version!
dmsreq02.lha	VX	2K	DMSREQ 0.2 by Julie Of The Bold And The Beautiful. This opens a filerequester, when you type Just DMS, so you can select a dms archive which you want to undms. This can use ANY dms version but you need is OS3.0!
dmsv.lha	VX	4K	DMSV version 1.0 by Shagratt of LSD - This useful program makes DMS verify when if writes to disk. This is only a patch file, you run it before DMS, it does not un-DMS a disk for you! It also fixes the old disk archiver WARP to verify and has a few other useful options. Although the new versions of DMS do verify, its great for old warps.
lsd-xmsh.lha	VX	80K	LSD Presents Xmask 1.0 By Hydra. This is a new Disk Masher Program that compresses disks with the XPK Compressor libraries (included!) for maximum Compression and Flexibility. Supports File_ID's, Text, Appending, Virtual Disks (teqdisk). Comes with utils and /X Icons too.
LSDMSwin.lha	VX	31K	DmsWin 1.12A By Cath of LSD - This has a new feature, it will try and continue to decompress a bad dms archive.
xpr-pdms.lha	VX	1K	PatchDMS by TLS and XPress - I've written this hack so that I could un-dms some high density disks. I have a Power XL high density external drive, which DMS dosen't support, now it does, you can undms to

ram too!
