Release Notes

» The following applications **are not** installed by default, as they have been

obsoleted by Steam:

-Console Background Compiler

-Half-Life Launcher Elite

-MapInstall

-PakScape

» If you would like to install these applications, then you will have to manually

select them on the components menu.

» A number of applications included in Half-Life Tool Pack require Microsoft .NET

Framework and an up-to-date version of DirectX. Links to these programs can

be found in the Half-Life Tool Pack program group on your startmenu.

» Unattended or "silent" installs are no longer supported; as certain user input is

required for proper installation.

Version History

Version 2.6
