

AVS Audio Tools

Version 3.4

AVS Audio Tools is a package of powerful digital audio utilities:

AVS Music Mix - to mix your audio files, add effects and filters,
AVS Audio Recorder - to record your own music or voice from input device,
AVS Audio CD Grabber - to rip audio tracks from CD to hard drive,
AVS Audio Converter - to convert your audio files,
AVS Audio CD Writer - to write audio CDs with favorite audio tracks,
AVS Audio MP3 Writer - to burn MP3 CDs with favorite audio tracks,
AVS Exact Audio CD Copier – to create exact copies of your audio CDs,
AVS iRadio Recorder – to record music off the Internet Radio.
AVS Ringtone Maker – to create custom ringtones.
AVS Mobile Uploader – to upload mobile content to Cells, PDAs, Flash

The following formats of audio files are supported:

- Uncompressed WAV PCM;
- Compressed WAV (GSM, ADPCM, DSP, U-Law, A-Law and others);
- MPEG2 Layer 3 (MP3), MPEG2 Layer 2 (MP2);
- WMA (Windows Media Audio);
- Ogg Vorbis;
- MPC (Music Pack);
- VOX (Dialogic ADPCM);
- RAW (Uncompressed PCM, U-Law, A-Law);
- G.726, G.723, G.721;

INSTALL:

run AVSAudioTools3.exe

SYSTEM REQUIREMENTS:

- Windows 98SE/ME/2000/XP operating system
- Windows XP SP2 necessary for AVS Mobile Uploader Bluetooth connection
- A sound card,
- A CD-RW drive,
- At least 50 megabytes of free disc space,
- RAM 128 Mb
- Internet connection to register the product.

(When you create an MP3 CD with folders and subfolders, it is required to create a disc image on your hard drive first. For this purpose you need to have approximately 700MB of free space on your hard drive for proper program performance.)
