

Disney's Hercules Action Game

Welcome to a sneak preview of Disney's Hercules Action Game! To run this demo, you need a computer with a Pentium 90 (or higher) processor, Microsoft Windows 95, and Direct X. If you've got all that, get ready for an action game of mythic proportions!

In this sample level, Hercules must battle and defeat the Cyclops before he destroys Thebes. To help Herc dodge falling columns, terrified Thebians, and run-away chariots on his way to victory, use the computer keys listed below. One hint, if you need a high-speed power burst, look for Hermes' sandals.

To play the rest of Hercules' action packed quest, look for Disney's Hercules Action Game--available now for PlayStation and in September 1997 on PC-CD ROM for Microsoft Windows 95. Both have everything you could want in a legendary game!
