MPEG-1

MPEG-1 video sequence structure. A video sequence consists of a series of pictures. Each picture is divided into slices. Each slice is divided into macro blocks. Each macro block is divided into blocks. Each block is 8 pixels by 8 pixels.

The video sequence is divided into frames. Each frame is divided into fields. Each field is divided into lines. Each line is divided into pixels.

The video sequence is divided into frames. Each frame is divided into fields. Each field is divided into lines. Each line is divided into pixels.

The video sequence is divided into frames. Each frame is divided into fields. Each field is divided into lines. Each line is divided into pixels.

The video sequence is divided into frames. Each frame is divided into fields. Each field is divided into lines. Each line is divided into pixels.

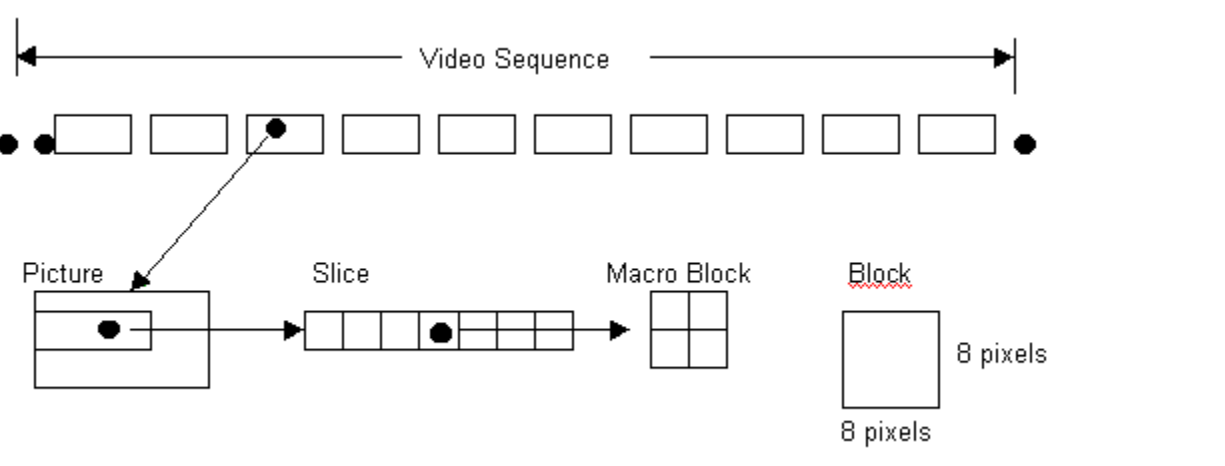

The video sequence is divided into frames. Each frame is divided into fields. Each field is divided into lines. Each line is divided into pixels.
