

# **DeskTop Solutions V1.1**

by

**Brazos Bayou Software**

**Jan 6, 1996**

## **Description**

DeskTop Solutions is a program that was designed for the computer user that enjoys a little variety in their life. It provides a means to Launch applications, screen savers as well as change the wallpaper and the system sounds.

The program is configured by accessing the System Menu and selecting the Configuration menu option. Another window will appear allowing you to select one of five different pages.

By default the General Setup window will appear the first time the configuration window is opened. This window will allow you to enable or disable the primary options available with DeskTop Solutions. The clock, and its related features, can be controled from this window. The clock can be used to launch screen savers by clicking it with the left mouse button, and the wallpaper may be changed by clicking it with the right mouse button. There is also a section for selecting which corner of the desktop the user may select to "Bring the Form to Top when" the mouse is either in the bottom right corner or the bottom left corner.

Applications may be selected from the Launcher window for display on the Main Toolbar. DeskTop Solutions will allow up to 16 applications to be selected from the existing applications are currently on the PC.

## **File List**

The following files were shipped with this program:

DESKSOL.EXE	DeskTop Solutions executable file
DESKSOL.HLP	Help file (this file)
DBLCLK.DLL	The DLL used to hook Windows messages
README.WRI	Basic instructions and discription of DeskTop Solutions
FILE_ID.DIZ	Program discription file
ORDER.WRI	Order form

## **Installation**

The first step for installing the software is to create a directory to copy the above mentioned files. The name of this directory isn't important. Copy and/or unzip all the files into this directory. The program may be run directory from "File Manager" by locating the DESKSOL.EXE file and either double-clicking on the file or by selecting the File|Run option to execute the program.

In order to add this program to one of the Program Groups in windows select a Group from the Program Manager window and select the File|New option. A dialog window will appear titled "New Program Object" asking you if this is a New "Program Group" or "Program Item". It should default to "Program Item" as long as you selected a Program Group prior to selecting the File|New option. Select the OK button which will activate the "Program Items Properties" dialog window. Input "DeskTop Solutions" into the "Description:" field. Next, enter the name of directory and executable file in the "Command Line:" field, or else you may use the "Browse" button to locate the DESKSOL.EXE file in the directory you created earlier. Once these items have been completed, select the OK button to complete the installation.

It's recommended that DeskTop Solutions be part of the Startup Group in order to take full advantage of its features.

## **Configuration**

Use the System Menu to access the "Configuration" option. Directions on how to setup and configure all features of DeskTop Solutions may be found in the help (DESKSOL.HLP) file.

## **Uninstalling**

DeskTop Solutions may be uninstalled by simply deleting all the files in the directory you created above, and deleting DeskTop Solutions icon from the group. You may also want to delete the DESKSOL.INI file from the \WINDOWS directory.
