

To view the information in this Help file

1. Run RegCompact.
2. For Help on an item, click  at the top of the dialog box, and then click the item.

When you click the Compact button RegCompact will compact the selected registry hives and restart Windows.

This ListBox displays information about the registry hives on your computer. A check mark next to an item means that when you press Compact it will be compacted. If you do not wish to compact all the registry hives, click on the check boxes of the ones you do not want to compact.
