

Black Cat Systems

Black Cat Systems produces a variety of software programs for the Macintosh platform, specializing in the audio, science, health, and amateur radio markets. We've been producing software for the Macintosh since 1991.

Some of our titles include:

Atomic Mac - A comprehensive periodic table of the elements, containing both physical, chemical, and nuclear information. Quite possibly the most informative periodic table of the elements software package available.

Audiocorder - a sophisticated audio recording utility, it can operate both as a manually operated recorder, as well automatically recording based on a schedule, or only when sound is audible.

Sound Byte - The ultimate cart machine for the Macintosh, you can quickly and easily choose between hundreds of songs, sound effects, and other audio files, for instant sound playback. Sound Byte is in use by several professional sporting teams for stadium sound effects.

Diet Sleuth - Our nutritional logbook and calculator package. Keeping track of your daily calories, fat, protein, carbohydrates, and other nutrients was never so easy.

Health Tracker - an easy way to track and graph your measurements. Whether you're tracking your weight, blood pressure, glucose, or any other measurements, Health Tracker makes it simple.
