PrintKey® v3.07   Copyright© 1998 By Alfred Bolliger

FAQs   Frequently asked Questions (Please read this first before making an e-mail)

What is Printkey ? :

Printkey is a small utility that brings you back the Print Screen functionality of the Dos® days
And were not   implemented in Windows95® nor Windows98® and NT4.0®

How does printkey work ? :

After getting PrintKey from the Internet or CD-ROM Unzip it in a Directory of your choice
To unzip you will need PKUNZIP® or WINZIP® both are Shareware and can be found on the WWW
Now you will have to start Printkey.exe (double click on it)
After a few seconds a small ‚Hand' will appear on to the System Tray (there where the clock is)
Printkey will be ready for you to be activated.

How can I activate it ? :

Press the Key labeled as ‚Print Scrn/SysRq' on your keyboard that will bring you a dialog form there you can   setup
and print the portion of screen that you want

You can also right click or left click on the Hand icon and press ‚Open' or ‚Print the Desktop'

Will Printkey print also a Full DOS screen ? :

No !   Printscreen can only print Windows or parts of it and not DOS in full screen mode

How can I make that PrintKey will start every time I turn on the computer ? :

You will have to create a Short cut to it in to the Startup Folder mostly under ‚ Windows\Start Menu\Programs\
Startup'

Will Printkey work under Windows 3.0 or 3.11 ? :

No !   Only under 32Bit Systems Win95 Win98 NT4.0
