

Credit Card Math (32-bit) v2.01

Credit Card Math is Copyright © 1994-1998 by Michael J. Riley.
All rights reserved.

Credit Card Math goes behind the scenes and reveals the true hidden costs associated with credit card debt. It will give you the knowledge you need to get yourself out of debt fast, save money and beat credit card issuers at their own game.

Credit Card Math shows you how to save thousands of dollars in finance charges by simply understanding the secrets used by credit card issuers. It will teach you what the credit card companies do and how they purposely try and string out your payments for decades.

- Learn why it takes so long to pay off credit cards
- Find out how to save thousands in interest penalties
- Discover the common traps to avoid

Credit Card Math is and always will be a FREE program. You are encouraged to share Credit Card Math with your friends and associates as long as you include all files and do not modify any of the files.

We welcome comments and suggestions about Credit Card Math. Please send email to mrzilch@aol.com or visit our website at www.debtblaster.com for more information.
