made by : kidmagee
email : hobbes@dreamscape.com
price : FREE FREE FREE!!!!!!!!!!!!!!!!!!!!

other themes include : Calvin and Hobbes, 100aker wood, city of angels, animaniacs. Warped daisys, beauty and the beast

A li'l about my theme :

how to install :

After downloading and unzipping go to your desktop manager and install the theme as you usually do to the desktop theme maniger of your choice : ie... microsft plus!, desktop themes1.6 etc....

Most of my desktop themes are made for 800x600. But this one should work well with any size you choose. ☺

Font : most likely there will be a true type font style to install. this is done by right clicking on the true type font icon and chooseing cut. Then go to c:\windows\fonts and right click and press past.

Just a lil word:

Oh {just jokeing sorry ☺

Anyway now that iv gotten that out of my system lol . I really don't use allot of menue commands and menue popups. I find that at times they can be rather annoying.

Screensaver:

To install the screensaver right click where it says screensaver and choose install. now you will be able to controle it by going to controlpanel\display\screensaver. You may also need to make a copy and put into the following areas c:\windows and c:\windows\system

Next Page Please ->

I hope you have fun with this theme. I sure had fun making it ☺

Take care and have fun

Kid :-P

NOTE : AJs desktop themes ([http:// www.desktop themes.com](http://www.desktopthemes.com)) is not permitted to distribute this or any of my future themes, for he manipulates the original archive and charges !!! to download from his site.
