

## JRE Home Inventory Reports

JRE Enterprises presents JRE Home Inventory Reports for Windows. JRE Home Inventory Reports will allow you to produce various reports using the data that was entered via JRE Home Inventory. Reporting capabilities include true print preview, user selectable fonts, user-specified report filtering and breaks, and ability to create brief reports.

JRE Home Inventory Reports is coded using Microsoft Visual Basic, Microsoft Professional ToolKit for Visual Basic, and Sequiter Software CodeBasic.

## **Association of Shareware Professionals**

This program is produced by a member of the Association of Shareware Professionals (ASP). ASP wants to make sure that the shareware principle works for you. If you are unable to resolve a shareware-related problem with an ASP member by contacting the member directly, ASP may be able to help. The ASP Ombudsman can help you resolve a dispute or problem with an ASP member, but does not provide technical support for members' products. Please write to the ASP Ombudsman at 545 Grover Road, Muskegon, MI USA 49442-9427, Fax 616-788-2765, or send a CompuServe message via CompuServe Mail to ASP Ombudsman 70007,3536.

## Becoming a Registered User

We thank you for giving JRE Home Inventory a test drive. Registration is easy and it ensures that we at JRE Enterprises can continue to develop low cost, quality applications for Windows. When you register, you will be sent a registration code that will stop the annoying "Unregistered Shareware" message and stop the "(Unregistered Shareware)" footnote.

View REGISTER.WRI for current pricing information and registration form.

**License Agreement**  
**Copyright © 1992-1994 JRE Enterprises**  
**All Rights Reserved**

Installation of JRE Home Inventory on your computer system implies agreement with the terms and conditions below.

Distribution of JRE Home Inventory, its accompanying programs and documentation is considered as is. JRE Enterprises offers no warranties of any kind, expressed or implied. This includes, but is in no way limited to, warranties of JRE Home Inventory's merchant ability or fitness for a particular purpose. Under no circumstances will JRE Enterprises be liable for any damages which result from the use of this program or the inability to use it. Exclusion from liability includes, but is not limited to, lost profits, lost savings, or any other incidental or consequential damages.

JRE Home Inventory is distributed as Shareware. It is not free, freeware, or in the public domain. You may use JRE Home Inventory for a trial period of thirty days, at no cost to you, to determine if it fits your needs. If you decide to use JRE Home Inventory past the thirty day trial period, you must register and pay the applicable registration fee. Individual copies of the unregistered version of JRE Home Inventory may be given to friends and associates for the same thirty day free trial period. You may also upload JRE Home Inventory to the public section of a public BBS.

You may not modify or disassemble JRE Home Inventory, nor distribute any modified or disassembled versions of JRE Home Inventory. JRE Home Inventory may not be included with any other product without written permission from JRE Enterprises.

A single registered copy of JRE Home Inventory can be on more than one computers' hard drive at a time as long as no more than one of these computers has JRE Home Inventory in memory at the same time. You may make backup copies of JRE Home Inventory as necessary for archival purposes only.

U.S. Government RESTRICTED RIGHTS: Use, duplication, or disclosure by the Government is subject to restrictions as set forth in subdivision (b)(3)(ii) of the Rights in Technical Data and Computer Software clause at 252.227-7013.

**CodeBasic 5 DLL Sub-License Agreement**

This legal document is an agreement between you, the CodeBasic 5 DLL SUB-LICENSEE, and the CodeBasic 5 LICENSEE (hereinafter referred to as the "Agreement").

You are not being "sold" any Sequiter Software Inc. software. Instead, you are being granted the right to use Sequiter Software Inc. software through this license agreement. Sequiter Software Inc. retains all ownership of its software including all copies of its software.

**1. Definitions**

**Software** This is the Sequiter Software Inc. computer programs contained in this CodeBasic 5 software package or any computer programs containing parts of the computer programs in this package. These programs could be represented in any form: in print, as electronic source code, as compiled object modules, as a library file, a dynamic link library, or an executable program.

**Executable Software** This is a form of the Software which can be executed by the DOS, Microsoft Windows or OS/2 software packages.

**Distributable Software** This is any executable Software except for the CodeReporter executable program.

**DLL Software** This is a dynamic link library form of the Software which is executed indirectly under the DOS, Microsoft Windows, or OS/2 software packages. It includes Microsoft Windows and OS/2 dynamic link library forms of the Software. For the purpose of this license agreement, other forms of the Software which are executed indirectly, such as an AutoCad ".EXP" form of the Software, are also considered to be DLL Software.

## **2. Sub-License**

You may use the DLL Software with, and only with, the Distributable Software provided by the CodeBasic 5 LICENSEE. You may not use the DLL Software for any other purpose. Specifically, you agree not to use the DLL Software for the purposes of developing or creating Executable Software.

## **3. Transfer Restrictions**

The DLL Software is sub-licensed to you, and may not be transferred to anyone without the prior consent of the CodeBasic 5 DLL LICENSEE. Any authorized transferee of the sub-license shall be bound by the terms of this agreement.

## **4. Disclaimer**

The DLL Software is provided "as is" without any kind of warranty. It is your responsibility to determine whether the DLL Software is suitable for your purpose.

## **5. Miscellaneous**

This agreement is governed by the laws of the Province of Alberta, Canada. The CodeBase SUB-LICENSEE consents to jurisdiction in the province of Alberta, Canada.

## Main Window

The main window of JRE Home Inventory Reports allows you to create, view, save, and print reports. Saved reports can be retrieved, viewed, printed and deleted. JRE Home Inventory can be started, and various menu options can be selected.

The report windows allow you to create NEW reports or access SAVED reports. Pressing the INVENTORY button will invoke the JRE Home Inventory program.

The File menu item gives you the ability to perform printer setup. The Option menu item gives you the ability to run the Windows' calculator program, to customize the Printer fonts used for reports, specify whether ignore case on query will be on or off, and specify report options. The Help menu item provides the ability to display the about window, which gives the copyright notice and version/release number for JRE Home Inventory.

The STOP! button will close all open windows and terminate the JRE Home Inventory Reports program.

The following *shortcut* keys are available:

F3 Key	--	Stop JRE Home Inventory Reports
F12 Key	--	Start the calculator program

[New Report Window](#)

[Print Preview Window](#)

[Report Sub-Total Selection Window](#)

[Saved Report Window](#)

[Specify Filter for New Report Window](#)

## Specify Filter for New Report Window

The Specify Filter for New Report window allows you to enter query specifications when creating a new report. The query specifications will determine which records are included in the report.

Query criteria consist of a value preceded by one of the following operators:

=	Equal to
<>	Not equal to
>	Greater than
>=	Greater than or equal to
<	Less than
<=	Less than or equal to
\$	Contains

If no query criteria is specified, equal to (=) is assumed.

All the query operators, except \$, work by comparing the specified query criteria to the left-most portion of the record data. If they are equal, the record is included in the report. The \$ operator, Contains, works by scanning the record data to determine if the specified query criteria occurs anywhere within the record data. If the specified query criteria occurs anywhere within the record data, the record is included in the report. The \$ operator can not be used with the following fields: Quantity, Property Cost, Claim, Purchase Date, and Warranty Date. The \$ operator consumes more system resources than the other query operators.

The Ignore Case on Query option on the main menu determines how the specified query criteria is compared to the record data. When selected, the case of the characters is ignored when determining if the two strings match, i.e. an "A" equals an "a". When not selected, the case of the characters is considered when determining if the two strings match, i.e. an "A" does NOT equal an "a".

If all fields are left blank, then all records will be included in the report.

If your query returns no records, a message box is displayed asking if you want to return all records or specify new query criteria.

The EXIT button will continue the report creation process.

The following *shortcut* keys are available:

Alt+X or F3 Key	--	Exit
F12 Key	--	Start the calculator program

Related topics:

[Main Window](#)

[New Report Window](#)

## About Window

The about window displays the copyright notice and the version.release number.

## New Report Window

The new report window allows you to create reports. Click the print preview button to display the selected report, click the print button to print the selected report. **Shortcut:** Double-click on a report to print preview the report.

The type of reports available to be created are:

- Property listed by House and Room,
- Property listed by House and Insurance Category,
- Property listed by House and Personal Category,
- Claim listed by House and Room,
- Claim listed by House and Insurance Category,
- Claim listed by House and Personal Category,
- Property grouped by Insurance Category that exceed Insurance Limits
- Property listed with Expiring Warranties
- List of Insurance Policies/Categories
- List of Houses
- List of Personal Categories
- List of Rooms

If you have checked the Sub-total Selection check box, then the Report Sub-Total Selection Window will be displayed after the Print Preview button or Print button is pressed. An additional layer of sub-totals can be selected to be included on the report from this window. This option is only valid for the Property Listed by... and Claim Listed by... reports.

If you have checked the Specify Filter Criteria check box, then the Specify Filter for New Report Window will be displayed after the Print Preview button or Print button is pressed. Filter criteria can be specified to determine which records to be included in the report. This option is only valid for the Property Listed by... and Claim Listed by... reports.

The Claim Listed... reports only include property records that have values greater than zero in their claim fields. Additional filter conditions can be specified by checking the Specify Filter Criteria check box.

The EXIT button will close the new report window and return you to the main window.

The following *shortcut* keys are available:

- |                 |    |                              |
|-----------------|----|------------------------------|
| Alt+X or F3 Key | -- | Exit                         |
| F12 Key         | -- | Start the calculator program |

## Saved Report Window

The saved report window allows you to print preview, print or delete previously saved reports. You can scroll through the saved report list by using the scroll bar. Select a report by clicking on one of its fields. Click the print preview button to display the selected report, click the print button to print the selected report, click the delete button to delete the selected report. **Shortcut:** Double-click on a saved report to print preview the report.

The EXIT button will close the saved report window and return you to the main window.

The following *shortcut* keys are available:

Alt+X or F3 Key	--	Exit
Alt+D or F9 Key	--	Delete the selected saved report
Alt+P	--	Print the selected saved report
Alt+V	--	Print Preview the selected saved report
F12 Key	--	Start the calculator program

Related topics:

[Main Window](#)

[Print Preview Window](#)

## Print Preview Window

The print preview window displays the created or saved report, one page at a time. From the Menu bar, the report can be printed, paged backward and forward, and paged to the first page and last page of the report. If Enhanced Print Preview is on, then the report can be "Zoomed" in and out. Also, when you exit the report, you are asked if you want to SAVE the report for later retrieval.

The "File" menu item has two sub-items, "Print" and "Exit".

Click the "|<" menu item will display the first page of the report. Click the "<" menu item to display the previous page of the report. Click the ">" menu item to display the next page of the report. Click the ">|" menu item to display the last page of the report. **Shortcut:** Press the F8 or Page Down key to display the next page of the report. Press the F7 or Page Up key to display the previous page of the report. Press the Home key to display the first page of the report. Press the End key to display the last page of the report.

If Enhanced Print Preview is on, then click the "Zoom Out" menu item to view the full page of the report. Click the "Zoom In" menu item to revert to normal print preview. Enhanced Print Preview consumes more system resources and can considerably slow print preview. We do not recommend using this option with systems having less than eight megabytes of RAM.

The F3 key can be used instead of clicking the EXIT button to return to the New Report or Saved Report window.

**NOTE:** If a printer font is chosen that does not have a corresponding screen font, then "MS Sans Serif" will be used during print preview.

The following *shortcut* keys are available:

F3 Key	--	Exit
F7 Key	--	Scroll to the previous page of the report
F8 Key	--	Scroll to the next page of the report
F12 Key	--	Start the calculator program
DOWN Key	--	Scroll to the next page of the report
END Key	--	Scroll to the last page of the report
HOME Key	--	Scroll to the first page of the report
UP Key	--	Scroll to the previous page of the report

## Report Sub-Total Selection Window

The report sub-total selection window allows an additional level of sub-totaling to be done when creating new Property Listed by... and Claim Listed by... reports. ...Insurance Category reports can be sub-totaled by Personal Category or Room. ...Personal Category reports can be sub-totaled by Insurance Category or Room. ...Room reports can be sub-totaled by Insurance Category or Personal Category.

The EXIT button will continue the report creation process.

The following *shortcut* keys are available:

Alt+X or F3 Key	--	Exit
F12 Key	--	Start the calculator program

Related topics:

[Main Window](#)

[New Report Window](#)

## Set Print Margins

The set print margins window allows you to adjust the amount of print margin for top/bottom and sides. A margin between 0 and 1 inch may be specified. If 1 inch is specified for top/bottom, then a 1 inch margin will be added to the top and a 1 inch margin will be added to the bottom. This is in addition to any inherent margins added by the printer.

The UPDATE button will write out the new print margins.

The EXIT button will return you to the main window.

The following *shortcut* keys are available:

Alt+X or F3 Key	--	Exit
F12 Key	--	Start the calculator program

[Reports](#)

[About](#)

## Reports Option Menu Item

The reports menu item has the following sub-menu items: Brief Report, Enhanced Print Preview, Fit Report to Page, Include Additional Info Data, Location Separators, and Margins.

The Brief Report item will display a check mark next to it if it is turned on. Simply click the item to toggle between brief reports on and brief reports off. Brief Reports on causes all Property Listed by... and Claim Listed by... reports to display/print one line per item. The line will contain the Property Description, Unit Cost, Quantity, and Total Cost. No other data will be displayed or printed, even if Include Additional Info Data is on.

The Enhanced Print Preview item will display a check mark next to it if it is turned on. Simply click the item to toggle between enhanced print preview on and enhanced print preview off. Enhanced print preview allows Zoom Out, full-page print preview, and Zoom In, normal print preview. Enhanced Print Preview consumes more system resources and can considerably slow print preview. We do not recommend using this option with systems having less than eight megabytes of RAM.

The Fit Report to Page item will display a check mark next to it if it is turned on. Simply click the item to toggle between fit report to page on and fit report to page off. Fit Report to Page allows the full page width to be used when printing. By default, all the reports will print an 80 column report and will truncate data if necessary to fit within the 80 columns. If your printer supports greater than 80 columns, normally via landscape mode, then turning fit report to page on will cause reports to be spread across the entire width of the page. This will reduce or eliminate any truncation of data. You may also adjust printer font sizes via the [fonts menu item](#) to reduce or eliminate data truncation.

The Include Additional Info Data item will display a check mark next to it if it is turned on. Simply click the item to toggle between include additional info data on and include additional info data off. Include Additional Info Data determines if the Additional Information data element will be included on the Property Listed by... and Claim Listed by ... reports. Since this field can be up to 1400 characters in length, it may be appropriate not to include this data element on reports.

The Location Separator menu item will display a check mark next to it if location separator is turned on. Simply click the location separator menu item to toggle between location separator on and location separator off. If location separator is on, separator pages will be printed between location breaks. These pages will have printed on them the current location information. Page numbers will restart at one after each separator pages. Location separator works for the Property Listed by... and Claim Listed by... reports. Location separator pages do NOT display when doing a print preview.

Click on the Margins item to display the [Set Print Margins Window](#), which is used to adjust top/bottom and sides print margins.
