FC-Design Jingle'O'Matic 2.1

1996 Cartegnie Francois

This program needs VBRUN100.DLL and Windows with a mouse to run.

File JINGLE2.ZIP must contains :
0.ima to 9.ima
blank.ima
jingle2.exe
3dlabel.vbx
jingle.nam
jingle2.wri
file_id.diz
order.txt

With this program you can play jingles (here, they're in Wav format) like
on radios or other just by clicking on a button or pressing a key.

The file name must be typed in the box before the button with it number.
The "black" box is just for the file descript.

You can also Choose the file name by choosing in the menu "Set Names".
A Window allows you to choose them in your directories and choose the
number of the box to put it too.

To play a jingle, press its button or use the numeric keyboard like this :
Click on "Keyboard" (it's highlighted now) and now, press the number of
the box on your numeric keyboard. You can use it as long as the "keyboard"
button is highlighted. (For this, do not click on any box).

But this program can play the jingles automatically too !
For this, click on "Random" . It's now playing randomly the jingles
you've choosen ! To stop it, click on "Manual".
You can also set the maximum time it will play a jingle by entering your
own value in the menu "Random-Play Delay".

"Beep" just plays the windows's beep .

The "start" and "stop" buttons are used to start and stop the stop-watch.

The "Load Names" and "Save Names" menu events are used to save or load choosen
jingles.
