Introduction

Setup Instructions

Registration

World Wide Web

# Introduction

The purpose of this program is to automate the process of swapping various WINSOCK.DLL files for those of you who use more than one Internet service provider with your default Web Browser. With one quick double-click, you can swap up to three DLLs, and optionally launch your browser.

**CT Swapper** will only look in your **WINDOWS** directory for your WINSOCK.DLL files, so if you happen to have them anywhere else, you must move them there. If you have two different versions of the file, change the file extension of one of them to coincide with the appropriate provider. For example, if one of your providers is America Online, change the AOL Winsock file name to WINSOCK.AOL. Once you have done this, select Setup from the Options menu, and follow the simple instructions, which can be accessed by clicking on the Help button in the upper right corner, and selecting the appropriate field of inquiry.

Once you're up and running you can obtain complete file and version information about the WINSOCK.DLL file associated with each option by right-clicking on that option in the **Select Provider** area of the main screen.

# Setup Instructions

Suppose that you had three Internet Service Providers (ISP's) /Online Services, each requiring either its own proprietary/unique WINSOCK.DLL file, or a "native" WINSOCK.DLL file (i.e., included with your particular operating system), as follows:

**(1) CompuServe Information Manager**

(WINSOCK.DLL - Size: 136,048 / Date: 11/28/95 / Time: 9:46:52 AM)

**(2) America Online**

(WINSOCK.DLL - Size: 10,656 / Date: 11/7/95 / Time: 10:08:54 AM)

**(3) InterRamp Enabler**

(WINSOCK.DLL - Size: 2,880 / Date: 5/26/95 / Time: 10:57:01 AM)

You should check the documentation furnished by your Online Service or ISP to determine the actual WINSOCK.DLL file necessary for their particular software application.

## **STEP 1**

*Rename your WINSOCK.DLL files:*

- (1) Change the CompuServe WINSOCK.DLL to WINSOCK.CIS
- (2) Change the America Online WINSOCK.DLL to WINSOCK.AOL
- (3) Leave the InterRamp Enabler WINSOCK.DLL as WINSOCK.DLL

Remember that the AOL, CIM and IRE file extensions are only suggestions, however, these **must be identical** to those which are later entered into the **CT Swapper** Setup Dialog shown in Step 3 below. Since **CT Swapper** works by looking for the file extensions you have specified, and assumes that the WINSOCK.DLL file is associated with the extension that it doesn't find, *you must leave one of your files named WINSOCK.DLL Or **CT Swapper** will get confused.*

## **STEP 2**

Move the renamed WINSOCK.\* files from their present location to the \WINDOWS directory.

## **STEP 3**

Start the **CT Swapper** application by double-clicking its icon. Next, choose SETUP from the OPTIONS menu and enter the following data in the dialog box as shown below:

The image shows a Windows-style dialog box titled "CT Swapper Setup". It contains a table with two columns: "Option Name" and "Extension". There are three rows of options. Below the table is a section for "Web Browser Path" with a "Browse" button and a text field containing a file path. There is also a checkbox labeled "Launch Web browser on close." and "OK" and "Cancel" buttons at the bottom.

|          | Option Name    | Extension |
|----------|----------------|-----------|
| Option 1 | CompuServe     | cis       |
| Option 2 | America Online | aol       |
| Option 3 | InterRamp      | ire       |

Web Browser Path:

☒ Launch Web browser on close.

Notice that you may also optionally specify the default Web browser. When you are finished entering the option names, extensions and Web browser paths, click on OK. Note that the next time that you start **CT Swapper**, Option 3 will be selected by default (since you did not rename the WINSOCK.DLL file for the InterRamp Enabler option.).

# Registration

**CT Software**  
**759 Galleon Lane - Elk Grove, IL 60007**  
**USA**  
**1-800-617-7740**

If you wish to register the program, we do accept **VISA** and **MASTER CARD**. Our toll-free registration number is **1-800-617-7740**. The cost of registration is **\$10.00**. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

If you prefer mail, please send a check in the amount of **\$10.00** to the above address. Be sure to include your name, address, e-mail address, and the exact name of the program, so that we can immediately send you the registration information. If you would like a copy of the program on diskette, there is an additional **\$2.00** shipping and handling charge.

Upon receiving the check, we will e-mail you the registration code **immediately**. If you have any questions or comments, please don't hesitate to drop us a line. To reach **CT Software** by e-mail:

If you are a CompuServe subscriber, this program can be registered in the SWREG forum. The registration number is **10179**.

# CT Software Home Page

Please feel free to visit our WEB site, from which you can download software, and access complete product descriptions of the very latest versions of all of the shareware offered by CT Software, in addition to offering links to other excellent shareware sources. The **CT Software Home Page** URL is:

["http://members.aol.com/ron2222"](http://members.aol.com/ron2222)

Enter the name of your service provider here, as you want it to appear under **Select Service** in the programs main screen. You can enter up to 3 different services in this field.

Enter the file extension for the swapped WINSOCK.DLL files here. For example, if the first service provider you list is America Online, you might want to enter AOL here. When you are accessing your Web browser with another service, [CT Swapper](#) will rename AOLs Winsock file WINSOCK.AOL. **It is very important that you go into File Manager and actually rename your files to coincide with the file extensions entered here.** [CT Swapper](#) has no way of knowing which Winsock file is which, so you must initially let it know.

Enter the path to your default Web browser here. Once entered, **CT Swapper** can optionally launch your browser at the same time it is swapping files to match your selection.

When **CT Swapper** opens, the currently selected Winsock file is indicated. Double-clicking on the server of your choice will swap the file (if indicated), and close the program, optionally launching the default browser.

If the Launch Web browser box is checked your default browser will automatically launch upon closing the program by hitting the launch button. If it is unchecked, the button caption will read OK, and the program will save any changes you have made and simply close.
