Overview

Hang-It-Up allows you to schedule the shut down of any Windows 95 dial-up networking session. This allows you to leave Internet software running unattended and know that it will disconnect when the job is done.

You can set **Hang-It-Up** to hang up in 30 minutes, 24 hours, 5 minutes, immediately, or any setting you choose. This will let you walk away from a download and go to a movie, or used in conjunction with other ForeFront programs, set up sophisticated scripts to get your e-mail every night.

Using Hang-It-Up

Hang-It-Up is a simple, and useful program. You can use **Hang-It-Up** in many different ways:

- ◆ **Hang-It-Up** allows a user to schedule the shut down of a Windows 95 dial-up networking session.
- ◆ To have the program shut down immediately, type "hangitup" at a DOS prompt.
- ◆ Use Hang-It-Up with batch files.
- ◆ **Hang-It-Up** can also be used effectively with a scheduling program such as ForeFront's Schedule. Just schedule "hangitup.exe" with no parameters and it will hang up when scheduled.
