DESCRIPTION
Adobe PageMill is a comprehensive and easy-to-use Web publishing application that enables
mainstream business customers to quickly create and enhance content for the Web. PageMill 3.0
combines advanced features for web content creation with powerful site management
capabilities, allowing you to manage your Web links, search-and-replace across your site, and
more, all in an intuitive environment.

Adobe is providing this Try-Out version of PageMill 3.0 so that you can evaluate it to create fully
functional Web pages. This try-out version of Adobe PageMill 3.0 is fully functional, but will expire
15 days after it has been installed.

This Try-Out version of PageMill 3.0 includes full online documentation. Once you have launched
PageMill 3.0 Try-Out, choose Help > Contents.

This tryout version of PageMill 3.0 introduces many new features, including:
-- New site management tools
-- Improved uploader
-- Font face support
-- Borderless frames
-- Extendable architecture
-- Progressive JPEG support
-- Sticky cursor position
-- Multiple form support
-- More customization options
-- Improved on-line help
-- Inline Java support
-- More robust color pop-up menus
-- Enhanced preview mode
-- Live Web browsing
-- Support for Microsoft ActiveX
-- Enhanced color picker
-- Tooltip text
-- Improved table selection modes
-- Improved table layout
-- Enhanced right-click functionality
-- More readable HTML output
-- Support for named HTML color entities
-- Underline <U> tag support
-- Support for .shtml filetypes in Open and Save dialog boxes
-- Various user interface improvements
-- More items in pull-down menus
-- More keyboard shortcuts

After installing PageMill 3.0 Tryout, see the Readme.doc file in the PageMill 3.0 Tryout application folder for more details about the new features and known issues. For the latest information regarding PageMill, please visit the Adobe Web site (http://www.adobe.com/).

SYSTEM REQUIREMENTS
-- Intel(R) 486(TM) processor-based personal computer (Intel Pentium(R) or better recommended)
-- Microsoft Windows(R) 95 or Windows NT(R) 4.0 or later
-- For Windows 95, 8 MB of RAM (16 MB recommended)
-- For Windows NT 4.0 or later, 16 MB of RAM (24 MB recommended)
-- VGA color monitor (SuperVGA or better recommended)
-- 20 MB of available hard disk space
-- CD-ROM drive (required for the final release)

HANDLING NOTES
After downloading a ".exe" file in Windows, double-click on the ".exe" file to access the file's contents. Need help with downloading? See our Downloading Help documents.

INSTALLATION NOTES
PageMill 3.0 Tryout is fully functional, but it expires 15 days after it has been installed. Changes to your system clock may cause the PageMill Tryout to expire prematurely. Before installing the PageMill Tryout onto your system, disable any utilities that synchronize your system clock to a remote time source (e.g., network server or atomic clock). After you install the PageMill Tryout, do not change the time on your system clock.

1. Double-click the Tryout5 or Tryout5.exe file.
2. Follow the on-screen instructions to complete the installation.

After the PageMill Tryout expires, you can remove it from your system using its Uninstaller utility. Choose Start > Programs > Adobe > PageMill 3.0 Tryout > Uninstall PageMill 3.0 Tryout to start the Uninstaller. After you uninstall the PageMill Tryout, you cannot reinstall the application again on the same computer.

ADDITIONAL NOTES
Adobe Systems will not provide any technical support for the tryout version of PageMill. Adobe is providing this Try-Out version of PageMill 3.0 so that you can evaluate it to create fully functional Web pages. This try-out version of Adobe PageMill 3.0 is fully functional, but will expire 15 days after it has been installed.
