## **Help menu commands**

The Help menu offers the following commands, which provide you assistance with this application:

About     Displays the version number of this application.

Help       Offers you an index to topics on which you can get help.

## Setting the strength / spin

Once you have set the line of the stone and are ready to release it, press the 'S' key. The display at the top of the window will start to move up. To set the strength, press the 'S' key again, this will stop the display bar at the required strength and then the bar will start to move down. To set the spin, press the 'S' key again within the spin selection area.

Once the strength and spin have been selected, the stone will automatically be released down the ice.

## Setting the line

Left-click the mouse on the ice near the bottom of the screen to set the line. The initial position of the stone at the top of the screen will change accordingly.

## The Free Guard Zone Rule

A stone is in the 'Free Guard Zone' if it is in the area between the Hog Line and the Tee Line, but is not counting (not in the house). In this zone it is not allowed to remove from play an opponent's stone until the first four stones (both teams lead stone) have been played in that end. If an opponent's stone is removed in infraction to this rule, then the stone removed is replaced to its original position and the played stone is removed from play. This special rule does not apply to stones which are in the house (not in the 'Free Guard Zone').

## **Releasing the stone**

Once you have set the strength, spin, and line, press the spacebar to release the stone.

## **Future Enhancements**

Version 2.00 of PSCurl will include the following :-

- you will be able to play against the computer.
- ice conditions will change throughout the game.
- the handles will be displayed on the stone, showing the spin as the stones move.
- you will be able to save/restore games.

exit

### **Exit command (File menu)**

Use this command to end your PSCurl session. You can also use the Close command on the application Control menu. PSCurl prompts you to save documents with unsaved changes.

### **Shortcuts**

Mouse: Double-click the application's Control menu button.

Keys: ALT+F4

## **Brushing the stone**

Once the stone has been released, the cursor will change to a brush.

To brush any moving stone, press the left mouse button and move the cursor in front of the stone in a brushing motion.

Brushing a stone makes it travel further and also lessens the effects of any spin on the stone.

## **Curling Tips**

Stones counting points are those of one team which are nearer to the center 'tee' than any opponent stone at the completion of each end (score 1 point per closest stone).

When released, the stones can be given spin, or rotation, which causes them to curl when travelling down the ice.

Stones can be deliberately left short of the target in order to block your opponent's next shot.

Stones can be knocked out of play or knocked into the scoring zone.

Brushing a stone causes it to travel further on the ice and also decreases the effects of any spin on the stone, so a stone's movement can be altered after it is released.

The player who scores in an end must deliver the first stone in the next end.

The winner is the player with the highest score after 10 ends. If the score is level after 10 ends, then the first player to score in a succeeding end is the winner.

## **Undocumented Features**

DirectDraw doesn't seem to cope very well with different hardware. The stone sprites are drawn onto the ice surface with a transparent background so that you don't see the enclosing rectangle. However, some hardware configurations seem to get confused over where to get the background required for the sprite, causing the display to look a bit strange. This also affects the display of the brush cursor while the stones are moving.

The program will try and set the screen resolution to 1024x768 if it is necessary to do so. If this fails, try to set the resolution manually from the control panel.

DirectDraw needs a 256 colour palette in order to work. If the DirectDraw initialisation fails, try to set the palette colours manually from the control panel.

## **About command (Help menu)**

Use this command to display the copyright notice and version number of your copy of PSCurl.

## Context Help command

Use the Context Help command to obtain help on some portion of PSCurl. When you choose the Toolbar's Context Help button, the mouse pointer will change to an arrow and question mark. Then click somewhere in the PSCurl window, such as another Toolbar button. The Help topic will be shown for the item you clicked.

### Shortcut

Keys: SHIFT+F1

## **Title Bar**

<< Show your application's title bar here. >>

The title bar is located along the top of a window. It contains the name of the application and document.

To move the window, drag the title bar. Note: You can also move dialog boxes by dragging their title bars.

A title bar may contain the following elements:

- Application Control-menu button

- Document Control-menu button
- Maximize button
- Minimize button
- Name of the application
- Name of the document
- Restore button

**Scroll bars**

Displayed at the right and bottom edges of the document window. The scroll boxes inside the scroll bars indicate your vertical and horizontal location in the document. You can use the mouse to scroll to other parts of the document.

## Size command (System menu)

Use this command to display a four-headed arrow so you can size the active window with the arrow keys.

After the pointer changes to the four-headed arrow:

1. Press one of the DIRECTION keys (left, right, up, or down arrow key) to move the pointer to the border you want to move.
2. Press a DIRECTION key to move the border.
3. Press ENTER when the window is the size you want.

Note: This command is unavailable if you maximize the window.

### Shortcut

Mouse: Drag the size bars at the corners or edges of the window.

### **Move command (Control menu)**

Use this command to display a four-headed arrow so you can move the active window or dialog box with the arrow keys.

Note: This command is unavailable if you maximize the window.

### **Shortcut**

Keys: CTRL+F7

## Minimize command (application Control menu)

Use this command to reduce the PSCurl window to an icon.

### Shortcut

Mouse: Click the minimize icon on the title bar.

Keys: ALT+F9

## Maximize command (System menu)

Use this command to enlarge the active window to fill the available space.

### Shortcut

Mouse: Click the maximize icon on the title bar;  
or double-click the title bar.

Keys: CTRL+F10 enlarges a document window.

## Close command (Control menus)

Use this command to close the active window or dialog box.

Double-clicking a Control-menu box is the same as choosing the Close command.

Note: If you have multiple windows open for a single document, the Close command on the document Control menu closes only one window at a time. You can close all windows at once with the Close command on the File menu.

## Shortcuts

Keys:      CTRL+F4 closes a document window  
              ALT+F4 closes the PSCurl window

**Restore command (Control menu)**

Use this command to return the active window to its size and position before you chose the Maximize or Minimize command.

## **Switch to command (application Control menu)**

Use this command to display a list of all open applications. Use this "Task List" to switch to or close an application on the list.

### **Shortcut**

Keys: CTRL+ESC

### **Dialog Box Options**

When you choose the Switch To command, you will be presented with a dialog box with the following options:

#### **Task List**

Select the application you want to switch to or close.

#### **Switch To**

Makes the selected application active.

#### **End Task**

Closes the selected application.

#### **Cancel**

Closes the Task List box.

#### **Cascade**

Arranges open applications so they overlap and you can see each title bar. This option does not affect applications reduced to icons.

#### **Tile**

Arranges open applications into windows that do not overlap. This option does not affect applications reduced to icons.

#### **Arrange Icons**

Arranges the icons of all minimized applications across the bottom of the screen.

**No Help Available**

No help is available for this area of the window.

## **No Help Available**

No help is available for this message box.

<< If you wish to author help specific to each message box prompt, then remove the AFX\_HIDP\_xxx values from the [ALIAS] section of your .HPJ file, and author a topic for each AFX\_HIDP\_xxx value. For example, AFX\_HIDP\_INVALID\_FILENAME is the help topic for the Invalid Filename message box. >>
