A. Introduction
1. Welcoming Words
   Thank you for using MultiWin 2 from WDSoftware! This document has all that you need to run MultiWin 2 to its fullest, so read it thoroughly once you have installed the program.

2. MultiWin is Shareware - PLEASE READ
   Yes, MultiWin 2 is shareware. It has taken many precious hours to develop MultiWin 2. **Support this product by registering it.** I already thank many of those who have already supported the original MultiWin. Without them, I could not have brought you MultiWin 2.
   The only difference between the registered and the shareware version of

MultiWin is that the shareware expires after 15 runs. I'm giving you a full chance to evaluate it thoroughly. **It costs only $15 and you register it by a simple click of a button!** After filling out the form to register, you will immediately receive your personalized registration key via e-mail.

Go to section F, "Registering & Upgrading MultiWin" for more information on registration.

B. Product Overview

1. Description

There are many times that using just one Windows isn't enough. Maybe there is a killer app that runs only on a localized version of Windows. Maybe it's one of those Windows 98 incompatibilities that makes you want to use Windows 95 again. But you just can't throw out the Windows you are using right now? Never fear! MultiWin enables you to install multiple versions of Windows 9x in just one system! Only one drive is needed to get you started, so partitioning isn't needed at all. Just install and go!

It's also very easy to use. Unlike other multibooters, which runs on cryptic DOS screens, MultiWin is a friendly Windows application. Plus, new in this version is the MultiBoot Wizard, which makes multibooting easy even for starters. Other improvements from the previous versions include dramatic speed enhancement and language-related bug fixes.

2-1. Features

- Multiboot between different Windows system in **one partition**
- Supports **all** versions of Windows 9x series, regardless of language
- Easy preparation for new Windows installation
- **Unlimited** capacity; install as much Windows as you want
- Multi-language support; English and Korean in current version

2-2. New in MultiWin 2

- Change Windows in **single reboot** (2 reboots in MultiWin 1)
- Extensions can be used in naming Windows directory (Extensions not supported in MultiWin 1)
- Introducing **MultiBoot Wizard**; multiboot without worry
- Settings can be saved via 'Save' button
- Automatically converts MultiWin 1 settings and data to MultiWin 2 format
- Problems with some localized Windows versions possibly solved

3. System Requirements
● A computer that can run Windows 9x OS
● 1 MB of Hard Disk space for MultiWin itself (3MB during install)
● Enough Hard Disk space to install another Windows
  -Windows 95: 100 to 200 MB
  -Windows 98: 200 to 300 MB
 ~The minimum value: You have few programs installed in the system.
 ~The maximum value: You have many programs installed.
 ~Above applies to English version. Localized versions may need 50 to
   100MB more.

C. Installing and Uninstalling
1-1. Installing with Full Installation Package
  MultiWin 2 comes with a complete installation program. Unzip the
package to a temporary folder. Then, run Setup.exe and follow the
instructions to install MultiWin 2.

1-2. What happened to Minimum Installation Package?
  MultiWin 1 came in Minimum, as well as Full, package for compact
download. However, it has been discovered that using older system files
may cause problems when running MultiWin 2. Thus, Minimum package is
no longer provided so that users will not encounter such problems from the
beginning.

2. Uninstalling MultiWin 2
  MultiWin 2 is easily uninstalled from 'WDSoftware' menu of the Start
Menu by selecting 'MultiWin 2 Uninstall'. You can also uninstall
MultiWin 2 from 'Add/Remove Programs' applet in Control Panel. Find
'Wesley's MultiWin 2' in the list and double-click it.

D. Using MultiWin 2
1. Running MultiWin 2 for the First Time
  When you run MultiWin 2 after installing, the first thing that appears is
the 'New Windows Detected!' dialog box. Follow the instructions on the
screen and the current Windows will be included in the list.

2. Functions of the Controls
 I. **MultiBooting** Tab

i) **Current Windows**: Displays the name of Windows you are using now.

ii) **Change to**: After you have selected the Windows of your choice in the listbox, press this button to reboot to that Windows. If the selected Windows is the same as the current Windows, it will not do anything.

iii) **Description**: You can change the selected Windows' description with this button. If you've incorrectly entered a description for a certain Windows installation, this is where you can correct it.

iv) **Install Another**: When you want to install another Windows to your system, press this button. MultiWin 2 will prepare the system for it. You must have the Windows installation CD and a boot disk with CD-ROM support ready (the latter can be prepared during the process if you have selected 'MultiBoot Wizard' mode) before doing so. Note that you MUST install Windows, or your previous Windows and/or MultiWin 2 will not function properly.
Boot with the boot disk and start installing Windows. When Setup asks you where your Windows will be installed, specify a folder (directory) that no other Windows is installed. If you don't do so, Setup overwrites your previous Windows installation, messing up the whole process. After you've finished installing Windows, run MultiWin 2. You'll see the same dialog box that had appeared when you'd run MultiWin 2 for the first time. Follow the instructions and the newly installed Windows will be added to the list. After this, you can use MultiWin 2 to multiboot between the two Windows using **'Change to'** button.

  II. **Options** Tab

i) **Language**: Select the language MultiWin 2 will use. Current version supports English and Korean.

ii) **Operation Mode**: Decide how MultiWin 2 will behave (operate) in '**MultiBooting**' tab.

● **MultiBoot Wizard**: MultiWin 2 will guide you closely on multiboot operation with the new Wizard feature. It will make sure you haven't left anything out or make mistakes during the process.

● **Confirm Before Action**: MultiWin 2 will confirm the user before proceeding with the selected function.

● **Quick Action**: This mode assumes that the user is quite used to MultiWin 2, and it goes on to do the selected function immediately. This was the only mode MultiWin 1 had run on.

iii) **Save**: This button will save all the settings and update the Windows list.

iv) **Enter Registration Key!** : (Unregistered) Press this button to enter registration information that you receive when you register MultiWin 2.

v) **REGISTER ON-LINE NOW!!** : (Unregistered) To register immediately via Internet, press this button. It will take you to RegNow! on-line registration page.

vi) **TRIALS LEFT**: (Unregistered) Shows you how many times MultiWin 2 can be used before it expires. You have 15 trials. After MultiWin 2 expires, it will stop functioning, so please register it before this happens.

vii) **This product is**…: (Registered) Registered user's name appears here.

III. **About** Section (Right Side of Main Window)

Product's name and information for contacting WDSoftware is shown. Click on the hyperlinks to visit WDSoftware website or send mail to the author.

E. Troubleshooting Information

1. 'The file (File name) is out of date. This program requires a newer version' error

Some of the files that MultiWin 2 uses are already in use by another application, preventing MultiWin 2 from automatically updating it. One of such files is too old for MultiWin 2 to correctly operate with, and produces this error. Run 'ErrorFix.bat' file in MultiWin 2 folder and reboot to fix this problem.

2. Can't boot to Windows after pressing 'Install Another' button

MultiWin 2 changes your system so that it won't boot to the previous Windows when you've pressed that button. You must literally install another Windows before you can go back to the previous Windows.

3. MultiWin 2's shutdown process crashes Windows

Some other program may have conflicted with MultiWin 2's shutdown operation. It is recommended that you close other applications when you use MultiWin 2.

4. Other problems

E-mail the exact situation to WDSoftware for more help.

F. Registering & Upgrading MultiWin

1. Register via Internet

MultiWin 2 provides quick and easy registration through Internet. At the time of this writing, RegNow!, RegSoft.com and ShareIt! processes registration. Fill out the necessary information in the registration form provided by them and you'll receive the registration key. The registration

fee is US$15 by this method.

By **RegNow!** : 'REGISTER ON-LINE NOW!!' button in MultiWin 2 loads RegNow!'s MultiWin 2 on-line registration form. You can also access this form by this URL:
  https://www.regnow.com/softsell/nph-softsell.cgi?item=1532-2

By **RegSoft.com** : This is the location of the on-line registration form:
  https://www.regsoft.com/cgi-bin/reg_it_offsite.pl?15748

By **ShareIt!** : This is the location of the on-line registration form:
  https://secure.element5.com/register.html?productid=105295&language=English
  In this case, $5 more is charged due to other additional overhead.

2. Register via Direct Payment

You can register MultiWin 2 by paying the author directly. Deposit the registration fee into the author's bank account and notify WDSoftware. The registration key will be sent via e-mail after confirming deposit.

Cho Hung Bank 910-04-224170 (pay to Chung Woo Duk)
Kyongnam Bank 598-22-0011209 (pay to Chung Woo Duk)

Listed banks are all in South Korea. The registration fee is 7500 won.

3. Upgrading from MultiWin 1

MultiWin 1 users can upgrade to MultiWin 2 for a small upgrade fee.

➢ US$7.00 via Internet, 2500 won via Direct Payment

For Internet upgrade, go to this URL and register:
  https://www.regnow.com/softsell/nph-softsell.cgi?item=1532-3

For those using Direct Payment, the payment method is identical to the normal registration. After confirming that the person is the registered user of MultiWin 1, the registration key is sent via e-mail.

False upgrade payment (non-registered person paying only the upgrade fee) will not be refunded.

4. Entering Registration Information

Click 'Enter Registration Key' button in MultiWin 2 and insert the received registration information by cutting (Ctrl-C) and pasting (Ctrl-V). Typing in the information manually is not recommended as the information may be entered incorrectly.

G. WDSoftware is...

WDSoftware is a Windows utility producer that is currently located in Ulsan, South Korea. It was originally founded in Canada in 1993, and its main office had moved to South Korea a year later. Its main product is Windows multibooter MultiWin.

WDSoftware can be reached by many ways. Refer to the website and e-mail address listed at the top of document. Any suggestions or bug reports are welcome here.

H. License Agreement

This Limited Use Software License Agreement (the "Agreement") is a legal agreement between you, the end-user ("Licensee"), and the creator ("WDSoftware"). By using this software or storing this program ("MultiWin") on a computer hard drive (or other media), you are agreeing to be bound by the terms of this Agreement.
If you do not agree to the terms of this Agreement, delete the software from all storage media.
You may install this program to test and evaluate for 15 trial runs; after that time you must either register this program or delete it from your computer hard drive (or other media).
This software may be distributed freely on online services, bulletin boards, or other electronic media as long as the files are distributed in their entirety. This software may not be distributed on CD-ROM, disk, or other physical media for a fee without the permission of WDSoftware.
You may not alter this software in any way, including changing or removing any messages or windows.
You may not decompile, reverse engineer, disassemble or otherwise reduce this software to a human perceivable form. You may not modify, rent or resell for profit this software, or create derivative works based upon this software. You may not publicize or distribute any registration code

algorithms, information, or registration codes used by this software without permission of WDSoftware.

I. Disclaimer

THE SOFTWARE IS PROVIDED TO LICENSEE "AS IS". ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS, AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

THIS SOFTWARE IS NOT FAULT TOLERANT AND SHOULD NOT BE USED IN ANY ENVIRONMENT THAT REQUIRES THIS, SUCH AS ON-LINE CONTROL OF AIRCRAFT.

TO THE EXTENT NOT PROHIBITED BY APPLICABLE LAW, WDSOFTWARE'S AGGREGATE LIABILITY TO LICENSEE OR TO ANY THIRD PARTY FOR CLAIMS RELATING TO THIS AGREEMENT, WHETHER FOR BREACH OR IN TORT, WILL BE LIMITED TO THE FEES PAID BY LICENSEE FOR SOFTWARE WHICH IS THE SUBJECT MATTER OF THE CLAIMS. IN NO EVENT WILL WDSOFTWARE BE LIABLE FOR ANY INDIRECT, PUNITIVE, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGE IN CONNECTION WITH OR ARISING OUT OF THIS AGREEMENT (INCLUDING LOSS OF BUSINESS, REVENUE, PROFITS, USE, DATA OR OTHER ECONOMIC ADVANTAGE), HOWEVER IT ARISES, WHETHER FOR BREACH OR IN TORT, EVEN IF WDSOFTWARE HAS BEEN PREVIOUSLY ADVISED OF THE POSSIBILITY OF SUCH DAMAGE. LIABILITY FOR DAMAGES WILL BE LIMITED AND EXCLUDED, EVEN IF ANY EXCLUSIVE REMEDY PROVIDED FOR IN THIS AGREEMENT FAILS OF ITS ESSENTIAL PURPOSE.
