

# MP3 EXE Converter

## Introduction

---

With MP3 EXE Converter you can create Selfplaying MP3 Songs. The Selfplaying MP3 Songs(exe format) is only added 10KB from the original MP3 song. MP3 EXE Converter is freeware! that means you can use it for free, and you can distribute it freely.

## How to use

---

First, launch MP3 EXE Converter, Click the button "Add" to add mp3 files that you want to convert to exe files to the list box. Second, select a directory which the exe files will be saved to. Last, Click "Convert", and then the all selected mp3 files will be converted to exe files. You can run the exe files to play mp3 songs directly.
