Introduction

CD Box Labeler Pro

© 1996-2003 Green Point Software UK Ltd

CD Box Labeler Pro is an easy to use labeler program for your DVD, CD Jewel Case & CD labels. You can edit text, insert images, select colors to suite your needs. CD Box Labeler has utilities that help you read the contents of the CD's and a wizard that helps you with the creation of label without need to learn the most advanced options of the program. CD Box Labeler Pro has the ability to scan, rotate, and flip images, and a selection of filter effects to help you alter the images.

CD Box Labeler Pro also supports pre made labels like Avery, Stomper, Neato, PressIt etc. this lets you continue use all your favorite labels in one easy to use label program, CD Box Labeler Pro is simply the most easy to use label program for all your label needs.

*** Shareware! ***
CD Box Labeler Pro is not free, you can use it for 30 days or 21 executions, and if after that time you decide to keep the program you must purchase a license. Please think twice before using a pirated version of CD Box Labeler Pro as we can not continue develop CD Box Labeler Pro if users do not pay for software they use. If you like CD Box Labeler Pro please consider paying for a license as you get lifetime support and free updates.

Your support helps us to continue to develop CD Box Labeler Pro.

Please visit www.gpsoftuk.com for more info on how to purchase an CD-ROM version or an electronic license.

Support

If you need help with CD Box Labeler Pro please visit our support page at
http://www.gpsoftuk.comExecFile("http://www.gpsoftuk.com").

Note!
Be sure that you have the latest version installed before you contact us, as your problem may already have been fixed in the latest version. Open the "about box" to see the version number.

Known Issues

Stomper, Zweckform, Neato, Press It, Traxdata, Boeder, Avery, Boma, 3T & Windows are registered trademarks of their respective owners.

IMPORTANT CALIBRATE PRINTER

Be sure to calibrate the printer before you print for the first time, the calibration can be made in the Set Options Dialog.

Click here for help on how to calibrate!

NOTE! You don't need to do this if you only print on plain paper!

Important Info On Premade Labels

Missing your favorite label?
E-mail to: support@gpsoftuk.com

Note! You can still user your label (CD-Label), simply calibrate one of the "Custom CD-Labels" in the program.

Note1:
We have been aware of that there exist "pirate made" labels of pre made labels. Our suggestion is; always use original labels since many "pirate made" labels are poorly made, both size and alignment of the labels can differ from label to label.

Note2:
Some companies change the alignment of the labels from time to time; it's almost impossible to know when this is done. In most cases are the alignments of the labels changed, and a recalibration is the only thing you have to do. But in some cases are the labels layout changed (like Zweckform), if you notice this on any label. Please e-mail us an offer to send us (2) copies of that label, we will then contact you with the address to send it if we do not have that label. We will then do our best to include the label into the next version of CD Box Labeler Pro.

Purchase a license

Purchase a serial
Please use this program to secureley purchase your license to CD Box Labeler Pro or visit our homepage at: http://www.gpsoftuk.com if you want to purchase this product on a CD-ROM

Mail Order!
Please see our home page on how to order by mail (Only CD-ROM orders can be purchased using mail order)

If you have any sales questions or OEM/Resale requests please contact sales@gpsoftuk.com

New/Chages in CD Box Labeler Pro

Please look in the changes.txt file where you installed CD Box Labeler Pro

License

Please read the license.txt file in the installation folder!

How To Make a Label

This is the basic function on how to make a label, to use the more advanced functions as add circles, more pictures, text-boxes etc. look in the how-to.. section.

To create a label follow these steps.

1. Start a new project

2. Press the label you want to edit (Front, Inside, Back, CD Label) in the "View"-Navigation Bar.

3. Press the Edit-Text icon on the toolbar .

4. Edit the index for the CD.

5. Close the Text-Editor to go back to the labels layout, press this icon again .

6. If you edit the Back Label edit the CD Name (spine text) by pressing this Icon .

6. If you want to change the background color, press the Background Color icon or
.

7. If you want to add a background image press the Load Background Image icon .
Note! This image will stretch itself over the whole label (except for the back label, this can be stretched

over the spines with the button). If you want to add more pictures or pictures that should not be stretched over the whole label; press this button
 and select where the picture should be loaded into (the picture can be manual stretched later).

8. Load your printer with the label(or plain paper) you want to print to the press the print icon and select the label type to print.

Note! Be sure to calibrate the printer in the Set Options dialog before you print to a premade label.

How To Add Text Box Object

Press this button on the "ToolBox".

When the Text Box Dialog opens, edit the text & font properties and press the OK button when finished.

How To Load Background Image

1. Press the Load Background Image icon on the toolbar

2. Select the image you want to load in the dialog box and press Open.

The image is automatic stretched to fit if the label.

Note!

If you want to load multiple images that can be manually stretched & moved on the label, press this icon instead and select where on the label you want the image.

How To Make A Floppy Or Zip Label

Select the "Floppy/Zip Label Tool" in the "Tools Menu".

When the Floppy/Zip Label Dialog opens. Edit the text as in any rich text editor(as word etc.).

Note!
You must save/print the Floppy/Zip Label in this dialog, this is because Floppy/Zip Labels are seperate from the rest of the program.

How To Navigate Trough Labels

CD Box Labeler Pro use a View-Navigation bar to select between labels.

Simply press one of the icons to chose the label to edit.

I.E. If you press "Front Label", then everything you do like; Load Images, Edit Text, Change Colors etc will be done into the Front Label Layout.

How To Select/Unselect & Move Objects

It's easy to select/unselect & move objects.

Select Object:
1. Press this button in the ToolBox (all current selected object will be unselected).
2. Either press and drag on the label, or click on the objects to select(Hold shift to select multiple objects).

Select Using Drag Method:
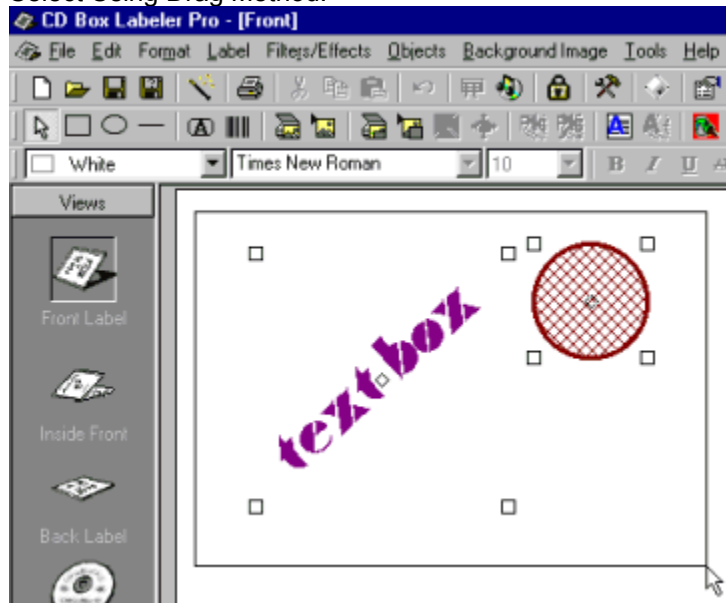

Select Using Click Method:
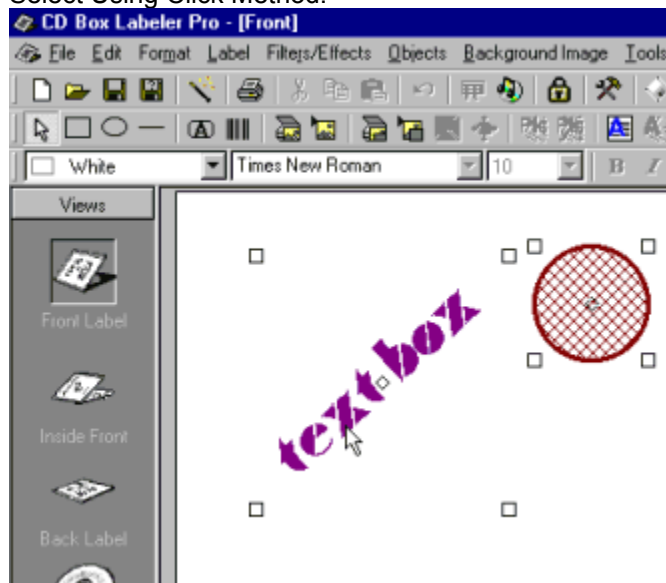

Move Objects:
1. Select the object
2. Press the rectangle (◇) on the object and holde the mouse to drag the objects.

You can also lock an object by pressing this button ![lock icon].

Move:
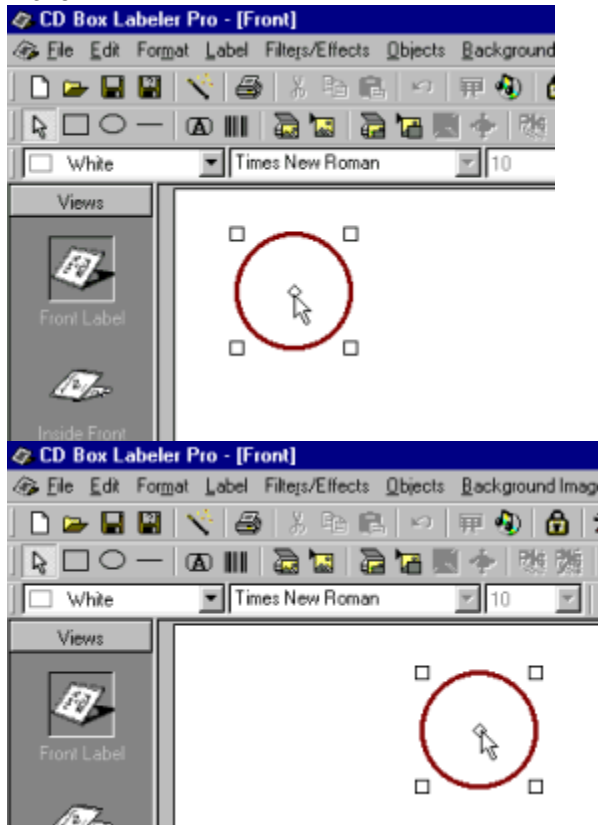

How To Read Files

1. Make sure you are in the Edit-Text Layout, if not press this icon ![icon]

2. Press the Read Files Icon on the toolbar ![icon]

You will see this dialog:
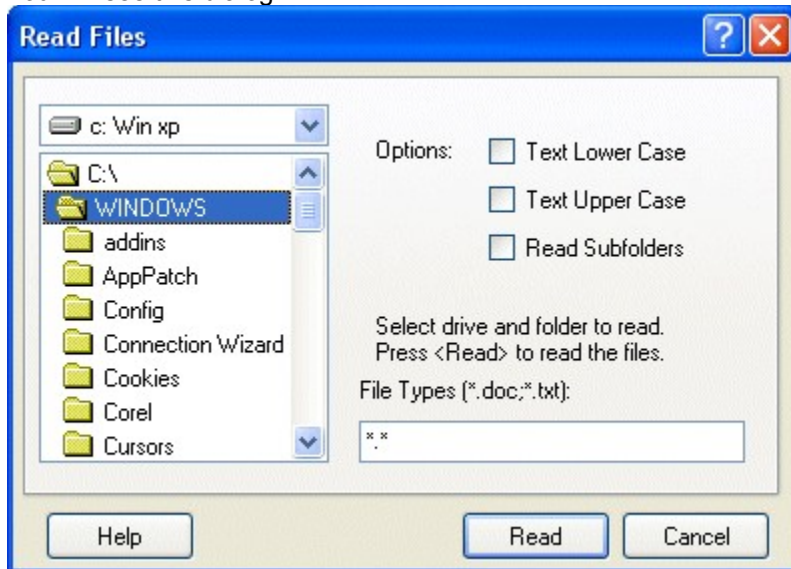

Select the Drive, Options & Filter types when finished press Read.

Read Disk Options:
Filter type: File types to read, *.exe;*.txt reads only files with the file extension exe & txt.

Upper or Lower Case: List the files in Upper or Lower Case (leave unchecked to use as it is original saved).

CD Box Labeler Pro will automatic add the contents of the disk and return to the Edit-Text Layout.

Note!
To read Music CD, please use the "Read Music CD" option!

How To Draw An Box, Line or Circle

1. Select one of these buttons in the ToolBox ▭
○
▬.

2. Draw the box/circle, line by holding the left mouse button and drag it.

Like This:
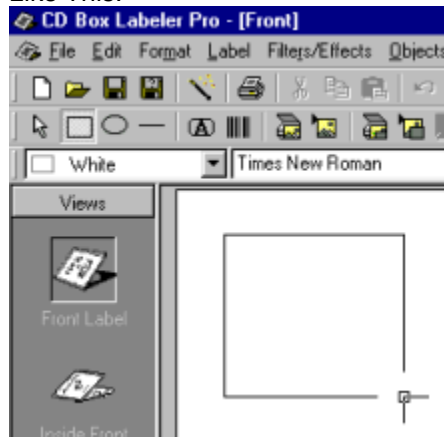

If you want to change line size, color, fill style etc. simply select it in this box.
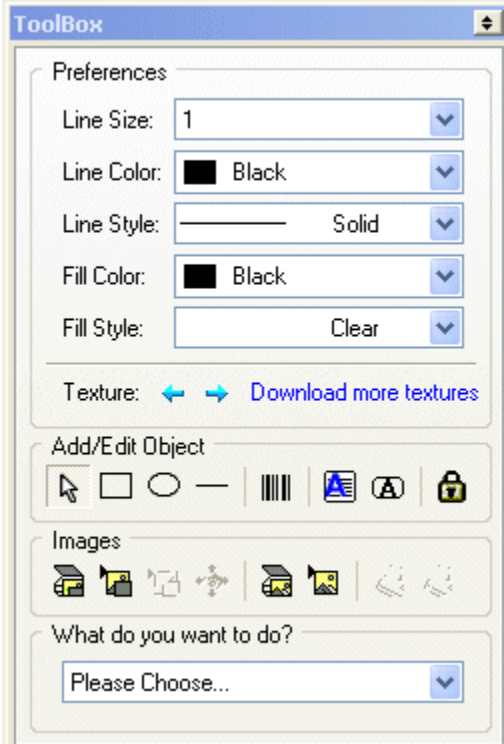

NOTE!
You can change the properties on already created object, simply select the object and change the line size, color, fill style etc.

How To Read A Music CD Using CDDB

Read Music CD has two different read methods;
1. Automatic add Artist, Tracks & Song Names in the right places on every label

2. Read only Tracks & Song Names (in the open Text-Editor Layout) .

If you want to do the automatic read make sure you are in the Labels Layout (with the Text Editor Closed)

1. Press the Read Music CD options icon

You will then see this dialog:

2. Insert a Music CD to read into a CD-Drive.
3. Close all other application accessing the CD.
4. Select the drive to read from.
5. Press the read button.

CD Box Labeler Pro will try to connect to the Internet and find a match, if a match is found it will automatic add both Artist Name, Tracks & Song Name to ALL the labels.

If you need to connect trough a proxy server, please click here on how to do that!

NOTE! If you only want to get the Tracks & Song Names into one (1) label open the Text-Editor Layout and follow the steps exactly as above!

NOTE2!
To read MP3-files please use the "Read Disk" option and select "*.mp3" as filter setting!

How To Rotate, Flip, Use Filters Images

CD Box Labeler Pro has several options to rotate, flip and use filters on background images.
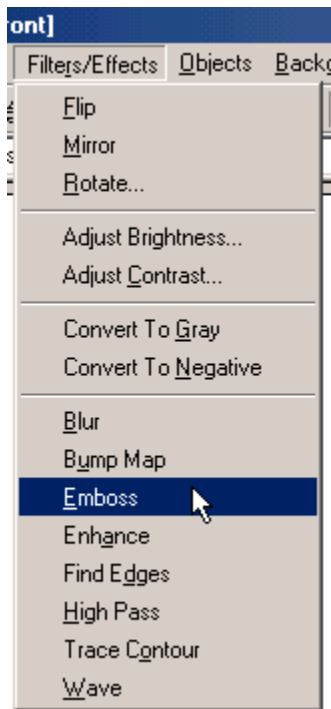

If you want to adjust an object:
1. Select the object you want to adjust.
2. Select the effect in the "Filters/Effects" menu.

If you want to adjust the background image:

Views

Front Label

Inside Front

Back Label

CD Label

DVD Cover
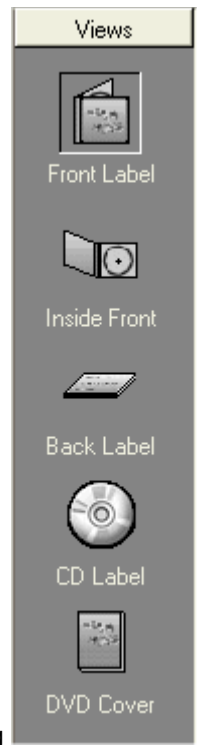

1. Deselect all objects (it can easy be done by pressing   )
2. Select the effect in the "Filters/Effects" menu.

Note!

If you are unhappy with the result, simply press the Undo button   .

How To Add A Barcode

To add a barcode to a label select Bar Code icon ▊▊▊ and enter the options, the barcode will then be added to the label (it can easy be dragged where you want it).

Following barcodes is supported:
EAN 8
EAN 13
Code11
Codabar
UPC_A
UPC_E

How To Change Background Color

You can change background color in these ways:

Solid Color:

Select a color in the Color Combo Box on the toolbar ▢ White ▾ , or press this icon

 on the toolbar and a dialog box will appear.

Shaded Color (transient between two colors):

Views

Front Label

Inside Front

Back Label

CD Label

DVD Cover
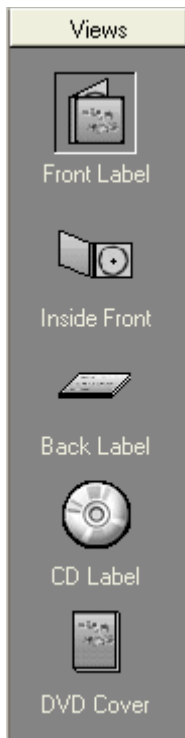

Press this icon _____ on the toolbar; you will then see this dialog:

Shaded Color

Select Colors

From: Red

To: Green

Preview:

Direction
☑ Vertical   ☐ Vert/In
☐ Horizontal   ☐ Horiz/In

Help   OK   Cancel
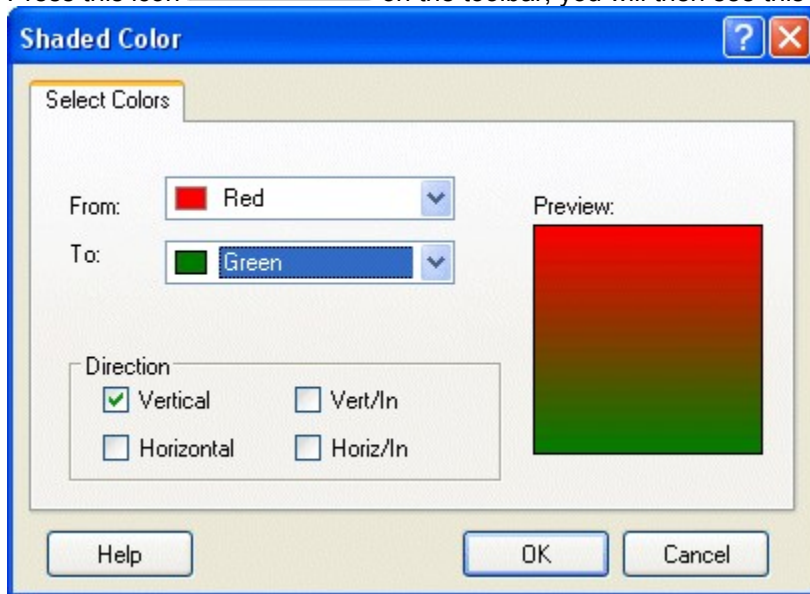

Select the From & To Colors to and the shade options.

NOTE!
It may look a little strange on the monitor if you use lower resolution than 24-bit, but the printout are shaded correctly.

How To Load Spine Images

Be sure that the Back Label Layout is enabled if not press the Back Label in the View-Navigation Bar.

1. Press this icon in the tool bar

2. Select the image and press open.

How To Align The Spine Text (CD Name)

Be sure that the Back Label Layout is enabled if not press the Back Label in the View-Navigation Bar.

1. Select the alignment of the spine as this:
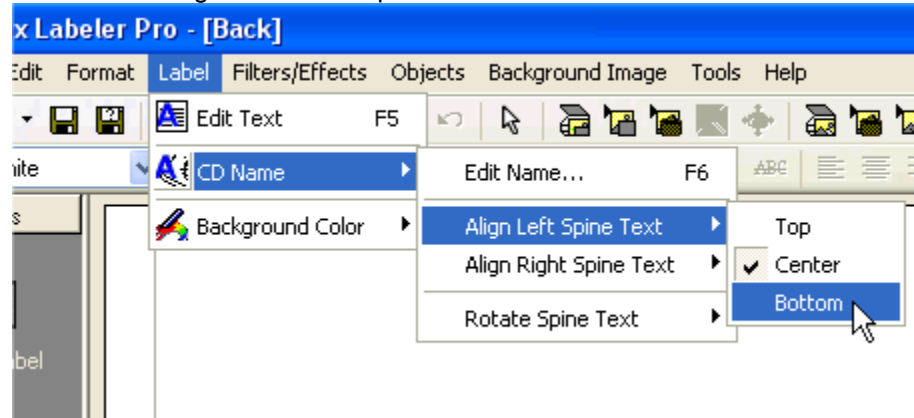

Options:
Top: Aligns the text to the top.
Center: Centers the text in the spine (default).
Bottom: Aligns the text then bottom.

How To Rotate The Spine Text (CD Name)

Be sure that the Back Label Layout is enabled if not press the Back Label in the View-Navigation Bar.

1. Rotate the spine as this:
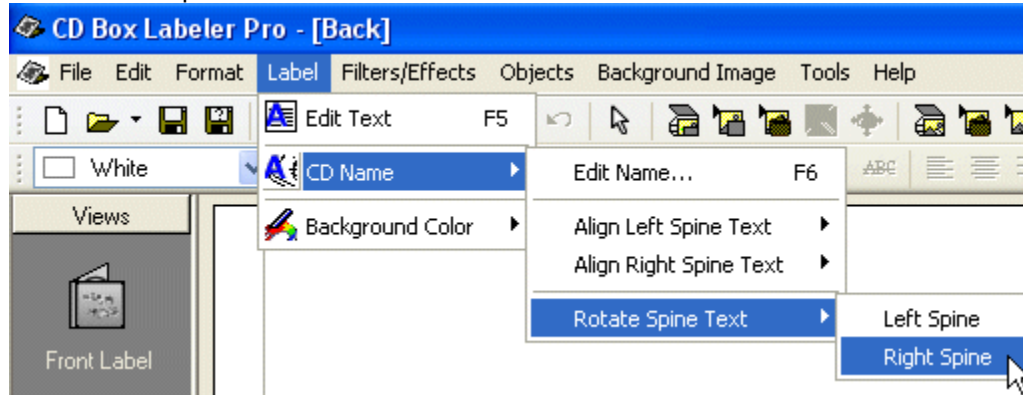

How To Move Objects Front/Back

To move object front/back of another:

1. Select the object to move.
2. Select the second object (hold down shift, both must be selected).
3. Click the button "Move Object Front Of" or "Move Object Back Of"

Note! Make sure only (2)two objects are selected.

To move object front/back of all other objects:

1. Select the object to move.
2. Click the button "Move Object Front" or "Move Object Back"

Note! All commands are not available at all times.

How To Set Options

To set CD Box Labeler Pro options select "Set Options" in the tools menu.

You will see this dialog:
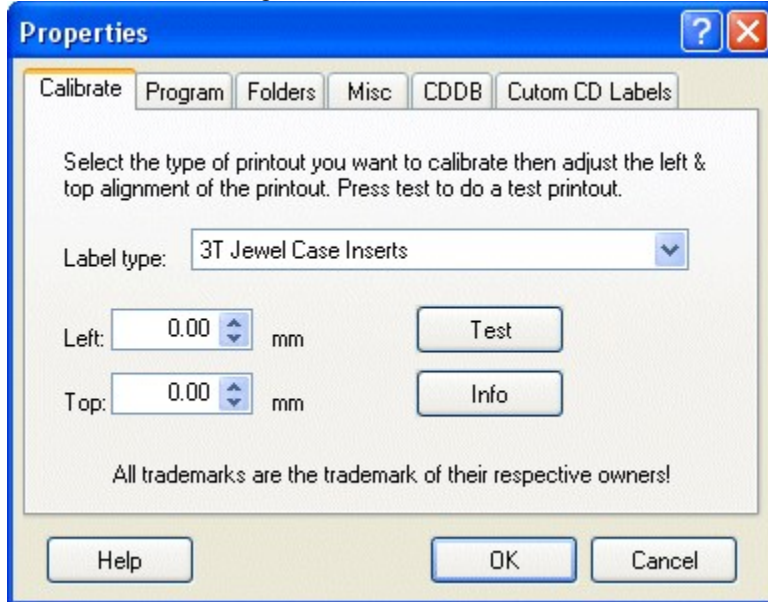

Calibrate Tab:
This is the most important options to select. You must calibrate the printout so it will print correctly on your printer.

1. Select the label you want to calibrate.
2. Load your printer with regular papers (do not use label sheets)
3. Do a test print.
4. Hold the "test print sheet" over the label sheet; make sure the top & left of the label is aligned to the top & left of the test printout sheet (it doesn't matter if the test printout sheet is bigger than the label).

If the test lines are not centered over the label, please alter the left and top properties, and do the test again.

Do this on ALL labels you plan to print to.

Program Tab:
Set Default Font & Size
Set option to Load Background Pictures Using Aspect Ratio
Hide Font Preview
Enable/Disable Balloon Help
Print Inlay Covers using the old way - This option will swap the front and inside cover when printing inlay covers.

Folders Tab:
Default Image & Project Folders

Misc. Tab:
Select if you want to enable compression on project files & the compression ratio.
Hide the confirmation dialog on "object delete" (Shift+Delete)

Enable Printer compatibility mode - Enable this if you can't print (get blank printouts or nothing happens).

CDDB Tab:
Here can you enter a proxy/firewall to use when connecting to the CDDB server on the internet.

Note! You only need to use this option if you connect to the Internet using a proxy server.

Custom CD Labels Tab:
Here can you rename the Custom CD Labels to another name instead of "Custom CD Label #1" etc...

The names will then be displayed in the printout menu:
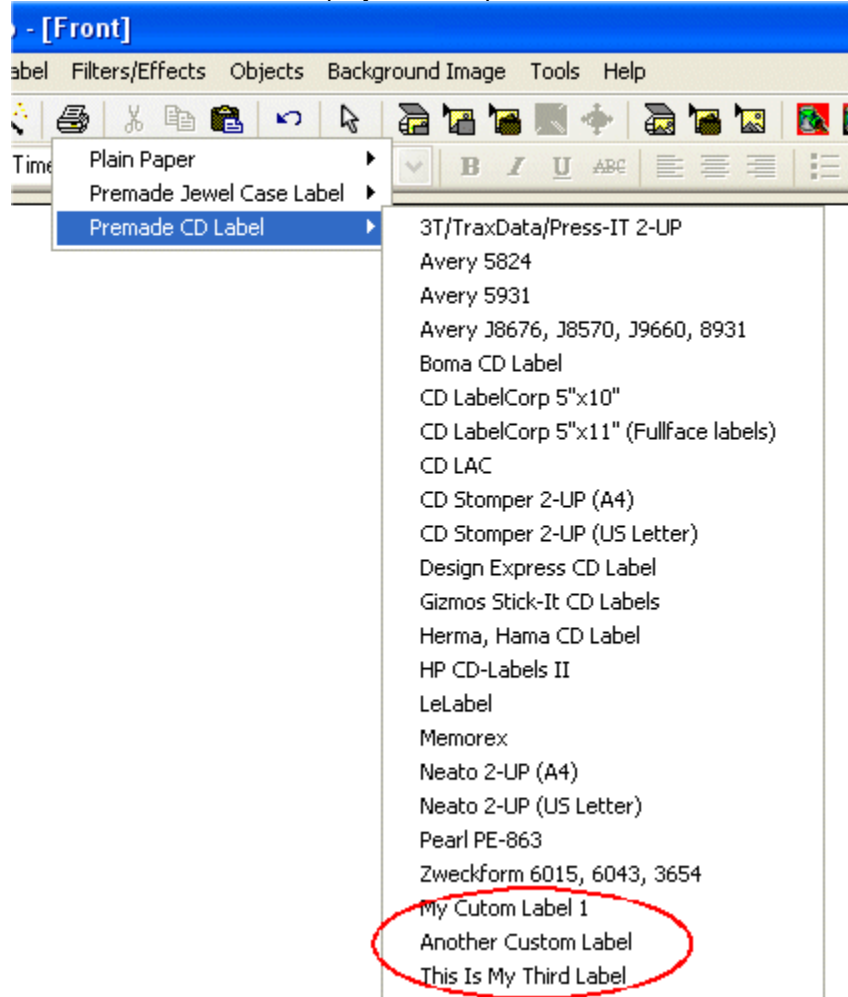

New Project

To start a new project.

1. Press the New Project Button

Wizard

Press the wizard icon on the toolbar to open the wizard dialog

You will see this dialog:

Press <u>next</u> to continue

Wizard

You will see this dialog

Enter the title of the CD like: My CD or press the "cddb" button to automatic read an Audio CD.

Click here for more info on how to use the CDDB option.

Press next to continue

Wizard

You will see this dialog

Edit the index to suit your needs. You can also press the "read disk" button to automatic read files from a disk.

Click here for more info on how to use the read disk option.

Press next to continue

Wizard

You will see this dialog
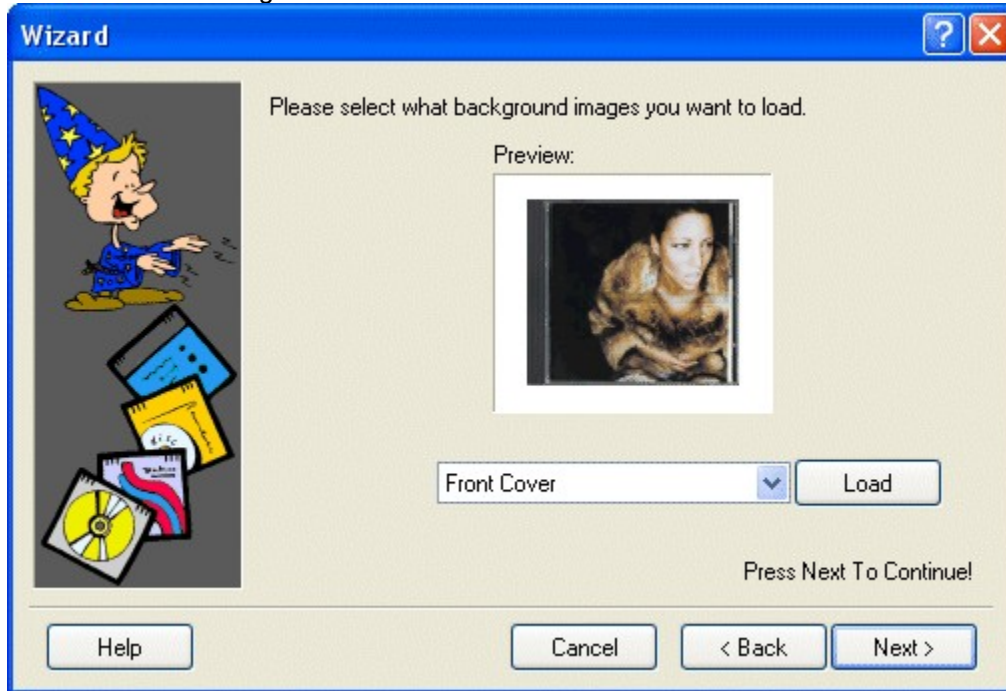

In this dialog can you select any background images you want to load. To load select to what label you want to load the image from the drop-down box and press the load button.

Press next to continue

Wizard

You will see this dialog
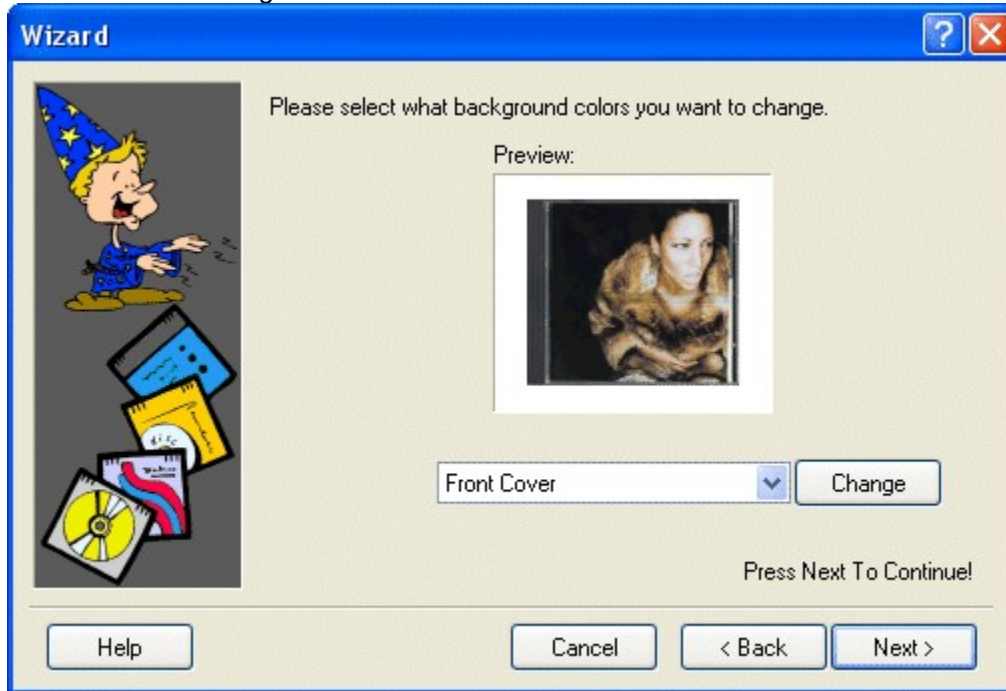

In this dialog can you select any background colors you want to change (the default color is always white). To change colors select what label you want to change the drop-down box and press the change button.

Note! There is no need to change the background color on a label if you have already loaded a background image on a label, as the background images are always stretched over the whole label and hides the background color.

Press next to continue

Wizard

You will see this dialog
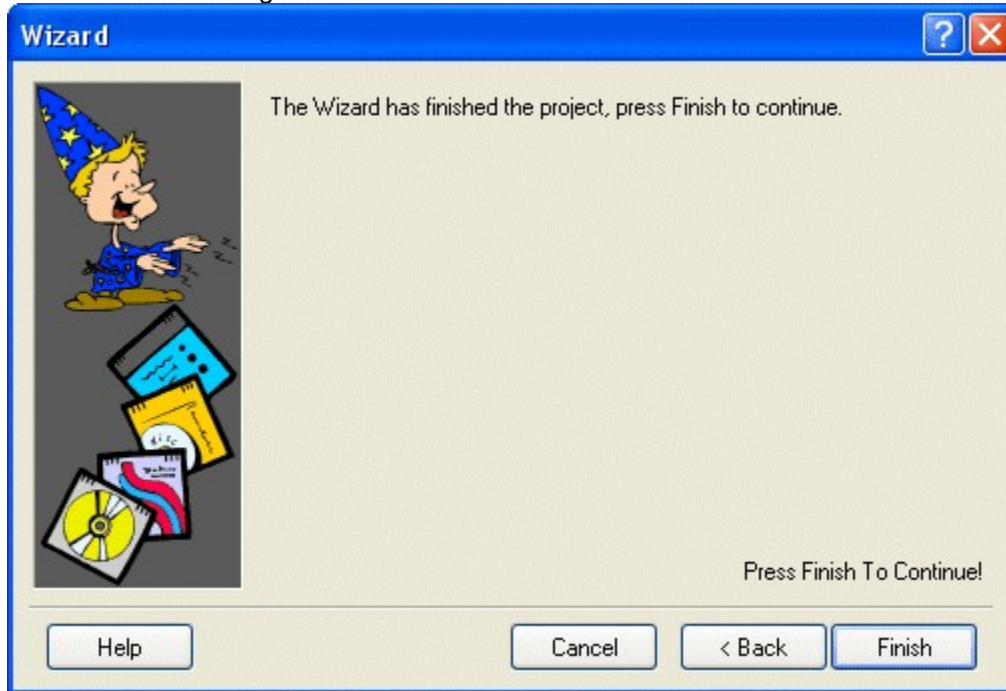

Press Finish to exit the Wizard and make the label.

Wizard

You will see this dialog

The picture "wiz-7.bmp" is missing!

Select the Background Colors.

Press next to continue

Wizard

You will see this dialog

The picture "wiz-8.bmp" is missing!

Press Finish to exit the Wizard and make the label.

There's no support for my label

2. Press SHIFT+DEL or select Objects-Delete Object in the menu.

Multiple objects can be deleted!

Edit text

CD Box Labeler Pro supports two ways to edit text, as objects supporting single font, size and color or as rich text supporting multiple fonts and colors.

To edit rich text:

1. Press this button .
2. Edit the text and use the controls on the toolbar to change fonts, colors, styles etc...
3. Press this button again when finished.
The text is the transferred in back of the label.

Note! Objects are always displayed over the rich-text, but are always printed below the text (this is a windows limitation).

To add a text box:

1. Press this button .
2. Edit the text in the text box and press the ok button.

If you later want to edit the text simply select the text box and press button.

Note! Small text sizes are best printed when using the rich text editor above.

Load background image

You can load images both as Background (loaded in the back and stretched over the whole label) and as objects (movable).

To load a background image:

1. Press the Load Background Image icon on the toolbar .
2. Select the image you want to load in the dialog box and press Open.

Note! Only one background image can be loaded, current background images are replaced if you load a new.
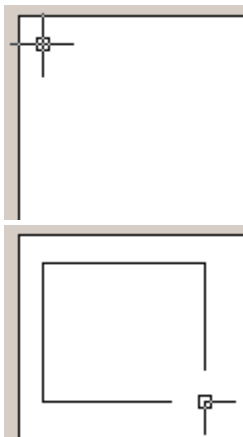

Load image object

Loading images as objects is simple, and these images can be moved & resized as you like.

To load an image object:

1. Press the Load Image Object button on the toolbar   .
2. Select the area on the label where the image should be loaded (press left mouse button and drag the mouse while the button is pressed).

3. Release the mouse button when you have selected the area.
4. A dialog will then appear where you can select the image to load.

Lock/unlock object positions

Sometimes can it be useful to lock objects in the current position.

To lock/unlock an object:
1. Select an object with your mouse.

2. Press the padlock icon on the toolbox .

The button will then be pressed every time you click on an object that is locked (this is to inform you that the objects position is locked).

Move Objects

To move an object:
1. Click on the object you want to move
2. Press and hold the left mouse button in the middle square while you move the object with your mouse.

Name my jewel case

To edit the name on the jewel case, simply follow these steps.

1. Select the "Back Label"

2. Press Edit CD-Name button on the toolbar [   ] .
3. Enter the CD Name and press ok.

Tip! You can align the text by align the left/right spine using the "label" menu (se pic).

Views

Front Label

Inside Front

Back Label

CD Label

DVD Cover

Print my project

You don't create a project for a specific label; instead do you select what type of label to print to (see pic).

CD Box labeler can both print on regular paper (all labels except CD labels); these are "Front", "Front & Inside", "Front & Back" and "Back". To print to any of these labels simply load your printer with regular paper and select the label to print to.

Print to Jewel Case Labels:
1. Load your printer with the label (read instruction on the label)
2. Select the label to print to in the "Premade Jewel Case Label" menu
3. Choose your printing options and press ok

Print to a CD Label:
1. Load your printer with the CD label, the label that is printed is the label closest to the printer (ignore all loading instructions on the labels here)
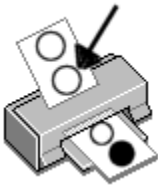

2. Select the label to print to in the "Premade CD Label" menu.
3. Choose your printing options and press ok

Turn the page and load the label again to print the other label (the label that should be printed has to be closest to the printer, see pic)

Resize an image object
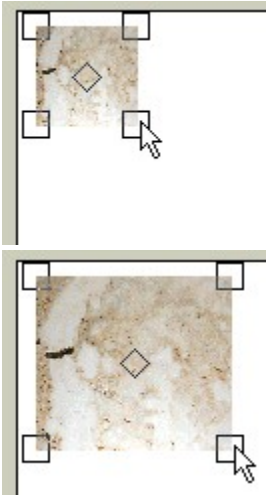

To resize an image object:
1. Select the object you want to resize with your mouse.
2. Press and hold down the left mouse button in one of the outer squares while you move the mouse.
3. Release the mouse button.

Tip! To resize using aspect ratio, hold down the ALT key while resizing.

Rotate an image

CD Box Labeler Pro supports the rotation of both background images and image objects.

To rotate an image object:
1. Select the object you want to rotate.
2. Select the Filter/Effects->Rotate... in the menu.
3. A dialog will then appear where you can set the rotation options.
4. Press ok when done!

You can always press the undo button if you are not satisfied with the result.

To rotate the background image:

1. Deselect all objects by pressing the selection arrow on the toolbar
2. Follow the instructions above.

Select/Deselect objects

Selecting objects is easy by simply clicking with your left mouse button on the objects; if you want to select multiple objects simply hold down the SHIFT while selecting objects.

To deselect all objects simply click on the selection arrow _____ .

Use filter effects on my images

CD Box Labeler Pro supports filter effects on both background images and image objects.

To use filter effects on an image object:
1. Select the object.
2. Select the effect you want to use under the Filter/Effects menu.

You can always press the undo button if you are not satisfied with the result.

To rotate the background image:

1. Deselect all objects by pressing the selection arrow on the toolbar
2. Select the effect you want to use under the Filter/Effects menu.

Use textures

CD Box Labeler Pro has a texture engine that enables you to simply change the background on your label with a few clicks. Please note that your current background image is replaced when you use the texture.

To change background texture:
1. Select the label you want the texture on.
2. Click on the texture arrow button on the toolbox to cycle trough the available textures.
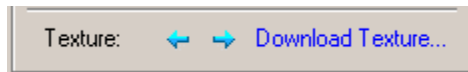

Note! Trial user have only 10 available textures, but registered users can download more by using the CD Box Labeler's texture downloader.

Paste an image into your label

CD Box Labeler Pro has the ability to paste images from other programs (using the clipboard) as objects. To paste an image into your project, right click with your mouse button on the label and select "Paste Image Object" from the popup menu.
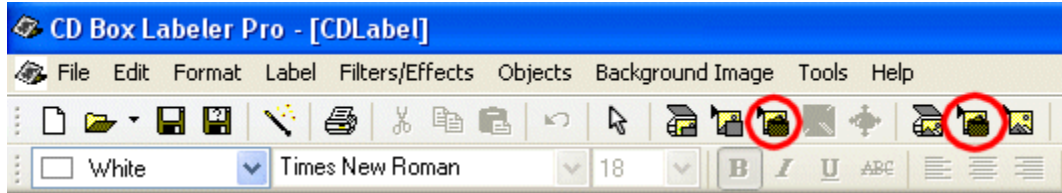

Set Proxy

To connect trough a proxy server when you connect to the Internet using the Read Music CD option.

1. Click on the Set Options icon
2. Click on the CDDB tab
3. Enable the "Use Proxy Server When Connecting" option
4. Fill in both Proxy Address and Port
5. Press the OK button
