

**IMPORTANT :** Due to a lack of freetime, the helpfile hasn't been updated so please read this file for the new features. There's no other support available.

The News feature has been removed and replaced by a new freeware :

HoverNews ! at <http://software.deviantart.com/details.php?id=282>

Due to recent Hotmail changes, the Hotmail support has been removed. It may be re-added in a later release.

**NOTE :** this version of EzPop is BETA so it means that the IMAP/MAPI support hasn't be fully tested yet.

Enjoy EzPop !

### **v3.70 beta (Oct. 2002)**

- **NEW : SMARTCLEAN ! Remove all unwanted emails (spam) with a single click !**  
Simply right-click on the main form then run SmartClean !  
EzPop will delete all the mails where headers (from/address/subject) are matching your spam list.
