Down Left Space	-	Backspin
Down Up Space	-	Windmill
Down Right Space	-	Handspin
Left Up Right Space	-	Flare
Down Up Down Space-		Headspin

Main Gameplay Points
- To win, a player must gain the largest amount of crowd support by performing moves and combos
  - Just because you have the lead doesn't mean you should stop doing moves, you crowd support will go down if you don't keep the crowd entertained

- The Spacebar is the last key of every button combination and must be in hit with the rhythm of the song playing for the player to complete the move without falling
  - The blinking light at the top of the screen can give you a hint as to what the rhythm of the song is
  - Although the Spacebar is the only key that MUST be hit in time with the music, keeping a rhythm throughout all of your button presses will greatly improve your performance
    - This can take a bit of practice to get good at, try doing simple moves first in a *combo… space combo… space   combo…. space* rhythm.

- Watch your stamina bar, if you perform too many tricks to quickly, you'll be too tired to perform any more until you rest up a bit.
