

Pasted Graphic 1.tiff "

SnapNDrag™

Screen capture simplified

Description

SnapNDrag is an application that makes screen capture extremely simple. Just click a button to capture and then drag the result off to another application or to the Finder.

For example, to e-mail your screenshot, simply drag it off SnapNDrag and drop it on your e-mail application. No file dialog boxes to navigate, no temporary files to delete. It is that simple.

And best of all, SnapNDrag is a **freeware!**

System Requirements

Mac OS X 10.2 or later (including Panther)

Installation Instructions

Just drag the SnapNDrag icon from the mounted disk image (where you found this document) and drop it in your Applications folder. Then double-click that to run.
