Introduction

HandPainter-PRO is a powerful yet easy to use painting program for Palm devices. HandPainter-PRO features a professional drawing tool, combined with a very smart, elegant and easy to use user interface.

HandPainter-PRO is one of the fastest painting tool ever designed for Palm OS. Featuring for example an almost instant flood fill (bucket tool), as well as a fast zoom operation and zoom scroll.

HandPainter-PRO is **very** small. Today as Palm applications become larger and heavier, HandPainter-PRO remains lean and takes less then 100Kb (about 150Kb in HiRes version) of your Palm device memory.

HandPainter-PRO is very powerful – featuring all the painting tools that you already know from your desktop machine. No shortcuts, no limitations. **Fully** operational 4 level zoom, with smooth zoom scroll for to moving around, flood fill, 3 spread width spray, 4 line widths, copy/move/cut functions, 4 text sizes, geometrical shapes, and much more...

HandPainter-PRO was designed to be user friendly and simple to use, with state-of-the-art user's interface, pop up toolbox's, and hidden color toolbar.

System Requirements

HandPainter-PRO supports palm color devices, either standard screen resolution (160x160) and enhanced version, that support HiRes screen (320X320) on Palm OS5 devices.

Grayscale devices aren't supported and there is currently no plan to support them in the future. However, if you own a grayscale device and want to use HandPainter-PRO, let us know at support@SoftAway.com. We are willing to release grayscale version, if there will be demand for it.

Installation

To install the program just copy to your handheld

"HandPainterPro.prc" file - for pre OS5 device, or

"HandPainterPro_HiRes.prc" for OS5 HiRes palm device.

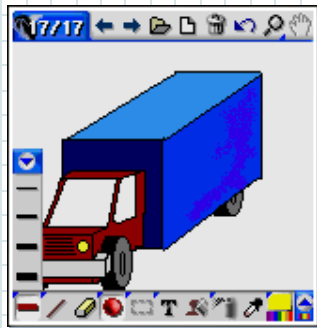

Registration

HandPainter-Pro is a shareware. It is given to you for 14 days evaluation period in full-functioning Trial mode. After the trial period is over, to continue using the software, you must purchase it. To order the software, please return to www.SoftAway.com. After purchasing, you will receive a registration-key according to your Palm user name (HotSync ID). If you're not sure what your user name is, you can see it in the register-dialog of HandPainter-PRO

software.

Registered user of this version can upgrade with no extra charge to the HiRes version (should be released in the near future), and get a free copy of our desktop plug-in, when it becomes available.

Many thanks to Erez Tal for the HandPainter-Pro logo.
