What's New

Version 2.2
Added info drawers for Mac to Palm.
Completely the "NSReceivervaluationScriptError: 4" bug.
Updated info window.

Version 2.2b1
New icon, thanks to Seb for that.
Added info drawers for Mac to Mac.
Added selectable support for:
- Airport
- Built-in Ethernet
- Firewire
- Internal Modem

Although you can only use these for Mac to Mac sharing at the moment.
Fixed the darn "NSReceivervaluationScriptError: 4" bug for Mac to Mac ONLY.
Textured buttons.

Version 2.1
Fixed Internet sharing and PPP script order.
Added four extra startup scripts.
Added a donate and website button.
Created a new About... window.

Version 2
The app now starts Internet Sharing for you at the click of a button.
Changed the GUI (again).

Version 1.2
Explained that some of the features that may seem strange, like sharing Built in Ethernet to Built in Ethernet are **not** typos.
Added a new menu, with the utilities in it, and the ability to launch other applications from it.
Added buttons to launch applications.
Revised some of the list text.

Version 1.1.2
Fixed Palm To Internet support
Updated Start-up Scripts
Updated GUI

Version 1.1.1
Resized a few GUI things.
Optimised code

Version 1.1
Added Palm support
New layout
