IMPORTANT: PLEASE READ BELOW

The ID code you entered requires Internet access to our servers to be verified. This is a one-time process, and the software will never attempt to access our servers again, unless you re-install.

The only information sent over the Internet is your ID code and the version of the software. Absolutely no other information is sent so you are guaranteed complete privacy.

If you do not already have an Internet connection please establish one now, check the certification below and click the Next button. The process should only take several seconds.

If you do not have Internet access on this computer or the software cannot access our servers because of a firewall or some other reason simply email us with your full name and ID code and we will provide you with an alternate method that does not require Internet access to our servers.
