

PLEASE READ CAREFULLY AND CERTIFY BELOW.

The only ways to legitimately license this software is to purchase a license directly from our website or by postal mail with the included order form.

If you have purchased your license legitimately then certify below and click Next to complete the licensing process.

If you have "received", "found" or otherwise "obtained" license information somewhere, be warned that what you are doing is illegal and morally wrong. If by some chance your license information is accepted now, it will soon be deactivated and you could be subject to criminal charges and liable for monetary damages.

I'm a small business owner who works hard to provide quality software at a fair price. I depend on sales to support my family. If you are stealing this software (*yes, it is stealing*), or worse yet, providing illegal license information to others, then please think twice before certifying below.

I'm an honest person trying to make an honest living All I ask is that if you find the software useful and want to continue using it, do the right thing and purchase a license. Please be honest!
