- [A] System Requirements
- [B] Installation Instructions

[A] System Requirements

The Autodesk Mechanical Desktop Demo CD requires a 486/33 or faster computer with at least 8 megabytes of memory and a double speed CD ROM drive. While a sound card is not necessary, it is highly recommended.

The Autodesk Mechanical Desktop Demo CD runs under Windows 3.x, Windows 95, or Windows NT Version 3.51 or higher. Under Windows NT 3.51, you may experience problems depending on your system configuration.

NOTE: For proper operation, there must be a Windows swap file of at least 4 megabytes. Please also make sure your Windows display is set to 256 colors (even if your graphics board is capable of displaying more colors).

In addition, better performance can be achieved by closing any open applications before running.

[B] Installation Instructions

To install the Autodesk Mechanical Desktop Demo CD:

1. Insert the Autodesk Mechanical Desktop Demo CD in your CD-ROM drive.
2. From Windows select File/Run or from Windows 95 select Start/Run and enter D:\SETUP.EXE, where "D" is the drive letter of your CD ROM.
3. Follow the onscreen instructions.
