### Exit

Exit the PhotoCalendar

## Address Book Menu Command

PhotoCalendar provides you a database to keep track of your daily contacts. all data entered are case sensitive (Mike and mike are different).

The main **Address Book** dialog box is as shown below:

Address Book			
Name	Telnet Computer Consultant		
Title			
Company			
Address	P.O. BOX 51863 Irvine, CA 92619-1863		
Home Phone			
Work Phone	[714]-651-9931		
Fax Phone	[714)-651-9931		
Email Address	See Notes		
Notes			
CompuServe : 71344,3244 AOL : Telnet Com			
<<	>>	Delete	New
Update	Search	Close	Help

### << and >> button

Use the << (Previous record) and >> (Next record) to browse the address book.

### New record

Click on the **New** button to create a new record, you must at least enter the name field in the dialog box to create the new record. After the record is entered, click on the **Ok** button to have the record stored, or click on the **Cancel** button to cancel the data you just entered.

The **Address Book** identifies each record by the name you entered in the name field, the current **Address Book** does not allow more than one record with the same name, PhotoCalendar will prompt you with the "Duplicate record" message when you try to enter a record that already exist in the **Address Book**.

### Update record

Click on the **Update** button to update the current record displayed on the screen. After the record is modified, click on the **Ok** button to have the modified record saved, or click on the **Cancel** button to cancel the data you just entered.

## Delete record

Click on the **Delete** button to delete the current record displayed on the screen. Once the record is deleted, it is permanently erased from the **Address Book** and is not recoverable.

## Search record

To search for a record, click on the **Search** button and a new dialog box will appear on the screen:

Enter *full* or *partial* name of the person you are looking for in the **Name** field and click on the **Start Search** button to begin searching. PhotoCalendar will find the closest matching record and display it on the screen. If a record can not be found, the last record in the **Address Book** will be displayed instead. After the search is completed, you can click on the **End Search** button to return to the **Main Address Book** dialog box, or click on the **Search Next** button to continue searching for the next matching record.

## Style Menu Commands

PhotoCalendar allows you to display varieties of calendar layouts on your screen. you can pick the one you like and PhotoCalendar will remember it when next time you re-start the program again.

### **Photo only.**

This is greate for [slide show](#) setup.

### **Photo with calendar at the bottom right corner.**

Display the photo together with the calendar, you can browse through the calendar as described in the [select date](#) section.

### **Photo with analog clock and calendar.**

Display your favorite photo while keep track of the day and time.

### **Photo with schedule and calendar.**

Display your favorite photo while working on your daily schedules, the [schedule list](#) box list all the schedule events you have so far for the selected day. you can browse through the calendar to setup the schedule for any day you desire.

You can also display the photo either in its [original](#) form or [scale](#) the photo to fit within the frame.

## Format Menu Commands

You can display the photo in its original picture format, or scale the photo to fit within the picture frame.

The current supported graphic formats are MicroSoft Windows Bitmap format (BMP) (Mono, 4-bit, and 8-bit) and CompuServe's Graphics Interchange Format (GIF-87A)

### **Original Picture Format**

In this mode, PhotoCalendar will display the photo base on its original height and width in pixels, and the color palette in the photo.

### **Scale Picture Format**

In this mode, PhotoCalendar will scale the photo to fit within the picture frame depend on the Calendar [Style](#) you chose. Some distortion might occurred depend on the resolution of the photo, the higher the resolution the better the photo can fit to scale.

## Photo Directory Command Menu

PhotoCalendar allows you to setup the location of your photos resided either on the hard disk, CD ROM or any of your floppy drives. Once setup, it will remember the location when next time you start up the PhotoCalendar again.

The current supported graphic formats are MicroSoft's Window Bitmap format (\*.BMP) and the Compuserve's GIF format (\*.GIF). You can use the **Photo Directory** dialog box to select the disk drive and directory that has all the above supported graphic files.

PhotoCalendar will create a **photo file list** in the selected directory and display them one by one daily.

you can also browse through the photo list by using the next frame or previous frame button in the control bar. When reach the end of the photo list, PhotoCalendar will display from the beginning of the photo list again.

PhotoCalendar allows you to setup a slide show with a set of preset intervals, the current preset intervals are 5 seconds, 10 seconds, 20 seconds, 40 seconds, and 1 minute.

## Import/Export Data

while you are in the address dialog box or in the schedule input dialog box, PhotoCalendar allows you to import/export data by using the windows clipboard.

### **To export data to the clipboard,**

- (1) Simply click on the edit box you want to export data,
- (2) Press down the left mouse button while dragging the mouse to mark the portion of the text you want to be exported,
- (3) Release the left mouse button and the selected text will be exported to the clipboard.

### **To import data from the clipboard.**

- (1) Simply click on the edit box you want to import data,
- (2) Click on the right mouse button and the text will automatically imported from the clipboard to the edit box.
- (3) Note that for creating new record or updating the existing record, you need to click on the **New** or **Update** button to have the import function working.

## Schedule Menu Command

PhotoCalendar allows you to add or delete the current selected day's schedule.

### Add Schedule

- (1) Pick the date from the calendar.
- (2) Click on the **Schedule** menu command and select the **Add schedule** menu item or simply click on the [Add schedule button](#) in the control bar.
- (3) The **Schedule Input** dialog box as shown below will pop up. Fill up the fields in the dialog box.
- (4) click on "Ok" button to finish the input, or click on the **Cancel** button to discard the input.

You must at least enter the time field in the dialog box, the current valid input values are in 12 hour format (as 9:00AM, 3:00PM etc.), it does not support the 24 hour format.(as 15:00).

You can import/export text from other applications by using the Windows clipboard. Refer to the [data import/export](#) section.

### Delete Schedule

- (1) First display the **schedule list box** by choosing the [Photo with Schedule list layout](#) from the [style](#) menu, select the item you want to delete and either click on the [Delete schedule](#) button in the control bar, or choose the **Schedule** menu command and select the **Delete schedule** item.

### Update a schedule

- (1) First display the **schedule list box** by choosing the [Photo with Schedule list layout](#) from the [style](#) menu, select the item you want to update, double click on the selected schedule and the **Schedule Input dialog** box will appear.
- (2) Start your changes and click on the **OK** button when finished or click on the **Cancel** button to discard the changes. Note that if you updated the time field, the original schedule entry will be deleted and replaced by the new schedule time.

### Alarm

PhotoCalendar provides you the alarm clock capability that you can setup to inform you of any events occur during the day. Simply check the alarm check box at the time you are entering the schedule and an alarm dialog box will pop up to remind you when that event has reached.

Note that in the **schedule list box**, any entry with an alarm clock icon in front represents the alarm setup, you can always enable/disable the alarm by checking or unchecking the alarm check box.
