IconManager+ 2.4

What Is IconManager+?

IconManager+ 2.4 Is A Small Utility, Made In Visual BASIC 3.0, For Viewing Icons That Are In ICO (Icon), EXE (Executable), DLL (Dynamic Link Library), And ICL (Icon Library) Format. Unfortunatley, IconManager+ 2.4 Will Not View NIL (Norton Icon Library) Format. There Is No Help File For It Because It Is Extremly Easy To Use. If You Have A Problem or Would Like To Report An Error, E-Mail Me At 72162,333 on CompuServe or At 72162.333@CompuServe.com on The 'Net.

Registering IconManager+

On Compuserve. Goto the SWREG Area and this program's ID is 7510.

REGISTER PLEASE!
