Print command (File menu)

Use this command to print a document. This command presents a Print dialog box, where you may specify the range of pages to be printed, the number of copies, the destination printer, and other printer setup options.

Shortcuts

Toolbar: 
Keys: CTRL+P

File menu commands

The File menu offers the following commands:

<u>New</u>	Creates a new document.
<u>Open</u>	Opens an existing document.
<u>Close</u>	Closes an opened document.
<u>Save</u>	Saves an opened document using the same file name.
<u>Save As</u>	Saves an opened document to a specified file name.
<u>Print</u>	Prints a document.
<u>Print</u>	Displays the document on the screen as it would appear printed.
<u>Preview</u>	
<u>Print Setup</u>	Selects a printer and printer connection.
<u>Options</u>	Manage options concerning QV behaviour
<u>Exit</u>	Exits QV.

Edit menu commands

The Edit menu offers the following commands:

<u>Cut</u>	Cut the selection into the clipboard or the whole document if here's no selection
<u>Paste</u>	Paste the content of the clipboard in the current document.
<u>Copy</u>	Copy the selection into the clipboard or the whole document if here's no selection
<u>Copy OLE</u>	Copy the whole document as an OLE Object
<u>Rescale</u>	Change the size of the current image
<u>-> BW</u>	Convert the current image to a black & white image
<u>-> Gray 16</u>	Convert the current image to a grayscale, 16 level image
<u>-> Gray 256</u>	Convert the current image to a grayscale, 256 level image
<u>-> Color 16</u>	Convert the current image to a 16 color image
<u>-> Color 256</u>	Convert the current image to a 256 color image
<u>-> 16,7M</u>	Convert the current image to a 16,7M color image
<u>Color</u>	

How to convert files between different file formats

- Open the image to be converted
- Copy the image or a selection
- Create a new image document of the desired type
- Check the 'Create from Clipboard' Option.

View menu commands

The View menu offers the following commands:

<u>Toolbar</u>	Shows or hides the toolbar.
<u>Status Bar</u>	Shows or hides the status bar.
<u>Drawing Tools</u>	Shows or hides the drawing tools.
<u>Drawing Attributes</u>	Shows or hides the drawing attributes.
<u>Zoom In</u>	Increases the zooming factor
<u>Zoom Out</u>	Decreases the zooming factor

Selection menu commands

The Selection menu offers the following commands:

<u>Select All</u>	Select all the image.
<u>Unselect all</u>	Discard any existing selection.
<u>Invert Selection</u>	Invert the current selection.
<u>Hide Selection</u>	Hide or Show the current selection.
<u>Draw Frame</u>	Draw a frame around the current selection.
<u>Hide Selection</u>	Fill inside the current selection.

Window menu commands

The Window menu offers the following commands, which enable you to arrange multiple views of multiple documents in the application window:

<u>New Window</u>	Creates a new window that views the same document.
<u>Cascade</u>	Arranges windows in an overlapped fashion.
<u>Tile</u>	Arranges windows in non-overlapped tiles.
<u>Arrange Icons</u>	Arranges icons of closed windows.
<u>Window 1,</u> <u>2, ...</u>	Goes to specified window.

Help menu commands

The Help menu offers the following commands, which provide you assistance with this application:

<u>Index</u>	Offers you an index to topics on which you can get help.
<u>Using</u>	Provides general instructions on using help.
<u>Help</u>	
<u>About</u>	Displays the version number of this application.

New command (File menu)

Use this command to create a new document in QV. Select the type of new file you want to create in the File New dialog box.

You can open an existing document with the Open command.

Shortcuts

Toolbar: 
Keys: CTRL+N

File New dialog box

Specify the type of document you wish to create:

ALBUM

JPEG

BMP

GIF

TIFF

Open command (File menu)

Use this command to open an existing document in a new window. You can open multiple documents at once. Use the Window menu to switch among the multiple open documents. See Window 1, 2, ... command.

You can create new documents with the New command.

Shortcuts

Toolbar: 
Keys: CTRL+O

File Open dialog box

The following options allow you to specify which file to open:

File Name

Type or select the filename you want to open. This box lists files with the extension you select in the List Files of Type box.

List Files of Type

Select the type of file you want to open:

ALBUM
JPEG
BMP
GIF
TIFF

Drives

Select the drive in which QV stores the file that you want to open.

Directories

Select the directory in which QV stores the file that you want to open.

Network...

Choose this button to connect to a network location, assigning it a new drive letter.

Previewing

You can preview graphic files. Select the file and click the Preview Button.
If "Dynamic" is checked, the preview is done when another file is selected.
If "Fast" is checked, the preview will be faster , but in grayscale.

Options

Manage options concerning QV behaviour.

[JPEG Options](#)

[GIF Options](#)

[TIFF Options](#)

Close command (File menu)

Use this command to close all windows containing the active document. QV suggests that you save changes to your document before you close it. If you close a document without saving, you lose all changes made since the last time you saved it. Before closing an untitled document, QV displays the Save As dialog box and suggests that you name and save the document.

You can also close a document by using the Close icon on the document's window, as shown below:

Save command (File menu)

Use this command to save the active document to its current name and directory. When you save a document for the first time, QV displays the Save As dialog box so you can name your document. If you want to change the name and directory of an existing document before you save it, choose the Save As command.

Shortcuts

Toolbar: 

Keys: CTRL+S

Save As command (File menu)

Use this command to save and name the active document. QV displays the Save As dialog box so you can name your document.

To save a document with its existing name and directory, use the Save command.

File Save As dialog box

The following options allow you to specify the name and location of the file you're about to save:

File Name

Type a new filename to save a document with a different name. QV adds the extension you specify in the Save File As Type box.

Drives

Select the drive in which you want to store the document.

Directories

Select the directory in which you want to store the document.

Network...

Choose this button to connect to a network location, assigning it a new drive letter.

1, 2, 3, 4 command (File menu)

Use the numbers and filenames listed at the bottom of the File menu to open the last four documents you closed. Choose the number that corresponds with the document you want to open.

Exit command (File menu)

Use this command to end your QV session. You can also use the Close command on the application Control menu. QV prompts you to save documents with unsaved changes.

Shortcuts

Mouse: Double-click the application's Control menu button.

Keys: ALT+F4

Undo/Can't Undo command (Edit menu)

Use this command to reverse the last editing action, if possible. The name of the command changes, depending on what the last action was. The Undo command changes to Can't Undo on the menu if you cannot reverse your last action.

Shortcuts

Toolbar: 
Keys: CTRL+Z or
ALT-BACKSPACE

Progressive Undo (Edit menu)

Undo the last action stroke by stroke.

Shortcuts

Keys: CTRL+Y or

Redo command (Edit menu)

Cut command (Edit menu)

Use this command to remove the currently selected area from the document and put it on the clipboard. If there is no area currently selected, the whole image is cut.

Cutting data to the clipboard replaces the contents previously stored there.

Shortcuts

Toolbar: 
Keys: CTRL+X

Copy command (Edit menu)

Use this command to copy selected area onto the clipboard. If there is no area currently selected, the whole image is copied.

Copying data to the clipboard replaces the contents previously stored there.

Shortcuts

Toolbar: 

Keys: CTRL+C

Copy OLE command (Edit menu)

Use this command to copy the whole document as an OLE object.

Copying data to the clipboard replaces the contents previously stored there.

Paste command (Edit menu)

Use this command to insert a copy of the clipboard contents. This command is unavailable if the clipboard is empty.

Shortcuts

Toolbar: 
Keys: CTRL+V

Toolbar command (View menu)

Use this command to display and hide the Toolbar, which includes buttons for some of the most common commands in QV, such as File Open. A check mark appears next to the menu item when the Toolbar is displayed.

See [Toolbar](#) for help on using the toolbar.

Drawing Tools command (View menu)

Use this command to display and hide the drawing tools. A check mark appears next to the menu item when the the drawing tools are displayed.

Drawing Attributes command (View menu)

Use this command to display and hide the drawing attributes. A check mark appears next to the menu item when the the drawing attributes are displayed.

Toolbar

The toolbar is displayed across the top of the application window, below the menu bar. The toolbar provides quick mouse access to many tools used in QV,

To hide or display the Toolbar, choose Toolbar from the View menu (ALT, V, T).

Click To

Open a new document.

Open an existing document. QV displays the Open dialog box, in which you can locate and open the desired file.

Save the active document or template with its current name. If you have not named the document, QV displays the Save As dialog box.

Print the active document.

Remove selected data from the document and stores it on the clipboard.

Copy the selection to the clipboard.

Insert the contents of the clipboard at the insertion point.

Status Bar command (View menu)

Use this command to display and hide the Status Bar, which describes the action to be executed by the selected menu item or depressed toolbar button, and keyboard latch state. A check mark appears next to the menu item when the Status Bar is displayed.

See [Status Bar](#) for help on using the status bar.

Status Bar

The status bar is displayed at the bottom of the QV window. To display or hide the status bar, use the Status Bar command in the View menu.

The left area of the status bar describes actions of menu items as you use the arrow keys to navigate through menus. This area similarly shows messages that describe the actions of toolbar buttons as you depress them, before releasing them. If after viewing the description of the toolbar button command you wish not to execute the command, then release the mouse button while the pointer is off the toolbar button.

The right areas of the status bar indicate which of the following keys are latched down:

Indicator	Description
CAP	The Caps Lock key is latched down.
NUM	The Num Lock key is latched down.
SCRL	The Scroll Lock key is latched down.

New command (Window menu)

Use this command to open a new window with the same contents as the active window. You can open multiple document windows to display different parts or views of a document at the same time. If you change the contents in one window, all other windows containing the same document reflect those changes. When you open a new window, it becomes the active window and is displayed on top of all other open windows.

Cascade command (Window menu)

Use this command to arrange multiple opened windows in an overlapped fashion.

Tile command (Window menu)

Use this command to arrange multiple opened windows in a non-overlapped fashion.

Tile Horizontal command (Window menu)

Use this command to vertically arrange multiple opened windows in a non-overlapped fashion.

Tile Vertical command (Window menu)

Use this command to arrange multiple opened windows side by side.

Window Arrange Icons Command

Use this command to arrange the icons for minimized windows at the bottom of the main window. If there is an open document window at the bottom of the main window, then some or all of the icons may not be visible because they will be underneath this document window.

Split Command (Window menu)

Use this command to split the active window into panes. You may then use the mouse or the keyboard arrows to move the splitter bars. When you are finished, press the mouse button or return to leave the splitter bars in their new location. Pressing escape keeps the splitter bars in their original location.

1, 2, ... command (Window menu)

QV displays a list of currently open document windows at the bottom of the Window menu. A check mark appears in front of the document name of the active window. Choose a document from this list to make its window active.

Index command (Help menu)

Use this command to display the opening screen of Help. From the opening screen, you can jump to step-by-step instructions for using QV and various types of reference information.

Once you open Help, you can click the Contents button whenever you want to return to the opening screen.

Using Help command (Help menu)

Use this command for instructions about using Help.

About command (Help menu)

Use this command to display the copyright notice and version number of your copy of QV.

Context Help command

Use the Context Help command to obtain help on some portion of QV. When you choose the Toolbar's Context Help button, the mouse pointer will change to an arrow and question mark. Then click somewhere in the QV window, such as another Toolbar button. The Help topic will be shown for the item you clicked.

Shortcut

Keys: SHIFT+F1

Title Bar

The title bar is located along the top of a window. It contains the name of the application and document.

To move the window, drag the title bar. Note: You can also move dialog boxes by dragging their title bars.

A title bar may contain the following elements:

- Application Control-menu button
- Document Control-menu button
- Maximize button
- Minimize button
- Name of the application
- Name of the document
- Restore button

Scroll bars

Displayed at the right and bottom edges of the document window. The scroll boxes inside the scroll bars indicate your vertical and horizontal location in the document. You can use the mouse to scroll to other parts of the document.

Size command (System menu)

Use this command to display a four-headed arrow so you can size the active window with the arrow keys.

After the pointer changes to the four-headed arrow:

1. Press one of the DIRECTION keys (left, right, up, or down arrow key) to move the pointer to the border you want to move.
2. Press a DIRECTION key to move the border.
3. Press ENTER when the window is the size you want.

Note: This command is unavailable if you maximize the window.

Shortcut

Mouse: Drag the size bars at the corners or edges of the window.

Move command (Control menu)

Use this command to display a four-headed arrow so you can move the active window or dialog box with the arrow keys.

Note: This command is unavailable if you maximize the window.

Shortcut

Keys: CTRL+F7

Minimize command (application Control menu)

Use this command to reduce the QV window to an icon.

Shortcut

Mouse: Click the minimize icon  on the title bar.
Keys: ALT+F9

Maximize command (System menu)

Use this command to enlarge the active window to fill the available space.

Shortcut

Mouse: Click the maximize icon  on the title bar; or double-click the title bar.
Keys: CTRL+F10 enlarges a document window.

Next Window command (document Control menu)

Use this command to switch to the next open document window. QV determines which window is next according to the order in which you opened the windows.

Shortcut

Keys: CTRL+F6

Previous Window command (document Control menu)

Use this command to switch to the previous open document window. QV determines which window is previous according to the order in which you opened the windows.

Shortcut

Keys: SHIFT+CTRL+F6

Close command (Control menus)

Use this command to close the active window or dialog box.

Double-clicking a Control-menu box is the same as choosing the Close command.

Note: If you have multiple windows open for a single document, the Close command on the document Control menu closes only one window at a time. You can close all windows at once with the Close command on the File menu.

Shortcuts

Keys: CTRL+F4 closes a document window
 ALT+F4 closes the QV window or dialog box

Restore command (Control menu)

Use this command to return the active window to its size and position before you chose the Maximize or Minimize command.

Switch to command (application Control menu)

Use this command to display a list of all open applications. Use this "Task List" to switch to or close an application on the list.

Shortcut

Keys: CTRL+ESC

Dialog Box Options

When you choose the Switch To command, you will be presented with a dialog box with the following options:

Task List

Select the application you want to switch to or close.

Switch To

Makes the selected application active.

End Task

Closes the selected application.

Cancel

Closes the Task List box.

Cascade

Arranges open applications so they overlap and you can see each title bar. This option does not affect applications reduced to icons.

Tile

Arranges open applications into windows that do not overlap. This option does not affect applications reduced to icons.

Arrange Icons

Arranges the icons of all minimized applications across the bottom of the screen.

Ruler command (View menu)

Choose Font dialog box

Choose Color dialog box

Find command (Edit menu)

Find dialog box

Replace command (Edit menu)

Replace dialog box

Repeat command (Edit menu)

Use this command to repeat the last editing command carried out. The Repeat menu item changes to Can't Repeat if you cannot repeat your last action.

Shortcut

Key: F4

Clear command (Edit menu)

Clear All command (Edit menu)

Next Pane

Prev Pane

No Help Available

No help is available for this area of the window.

No Help Available

No help is available for this message box.

Update command (File menu)

Print dialog box

The following options allow you to specify how the document should be printed:

Printer

This is the active printer and printer connection. Choose the Setup option to change the printer and printer connection.

Setup

Displays a Print Setup dialog box, so you can select a printer and printer connection.

Print Range

Specify the pages you want to print:

All Prints the entire document.

Selectio Prints the currently selected text.

n

Pages Prints the range of pages you specify in the From and To boxes.

Copies

Specify the number of copies you want to print for the above page range.

Collate Copies

Prints copies in page number order, instead of separated multiple copies of each page.

Print Quality

Select the quality of the printing. Generally, lower quality printing takes less time to produce.

Print Progress Dialog

The Printing dialog box is shown during the time that QV is sending output to the printer. The page number indicates the progress of the printing.

To abort printing, choose Cancel.

Print Preview command (File menu)

Use this command to display the active document as it would appear when printed. When you choose this command, the main window will be replaced with a print preview window in which one or two pages will be displayed in their printed format. The print preview toolbar offers you options to view either one or two pages at a time; move back and forth through the document; zoom in and out of pages; and initiate a print job.

Print Preview toolbar

The print preview toolbar offers you the following options:

Print

Bring up the print dialog box, to start a print job.

Next Page

Preview the next printed page.

Prev Page

Preview the previous printed page.

One Page / Two Page

Preview one or two printed pages at a time.

Zoom In

Take a closer look at the printed page.

Zoom Out

Take a larger look at the printed page.

Close

Return from print preview to the editing window.

Print Setup command (File menu)

Use this command to select a printer and a printer connection. This command presents a Print Setup dialog box, where you specify the printer and its connection.

Print Setup dialog box

The following options allow you to select the destination printer and its connection.

Printer

Select the printer you want to use. Choose the Default Printer; or choose the Specific Printer option and select one of the current installed printers shown in the box. You install printers and configure ports using the Windows Control Panel.

Orientation

Choose Portrait or Landscape.

Paper Size

Select the size of paper that the document is to be printed on.

Paper Source

Some printers offer multiple trays for different paper sources. Specify the tray here.

Options

Displays a dialog box where you can make additional choices about printing, specific to the type of printer you have selected.

Network...

Choose this button to connect to a network location, assigning it a new drive letter.

Page Setup command (File menu)

Save Copy As... command (File menu)

Embedded Object Resize Bar

Zoom In

Increases the zoom factor.
(the image will be displayed bigger)

Zoom Out

Decreases the zoom factor.
(the image will be displayed smaller)

Zoom 50 %

Set the zoom factor to 50 %.
(Image will be displayed half-size)

Zoom 100 %

Set the zoom factor to 100 %.
(Normal size)

Zoom 150 %

Set the zoom factor to 150 %.

Zoom 200 %

Set the zoom factor to 200 %.

Zoom Custom

Set the zoom factor to a given value

Rescale

Change the size of the current image.

-> **BW**

Convert the current image to a black & white image.

-> **GRAY 16**

Convert the current image to a Grayscale 16 level image.

-> **GRAY 256**

Convert the current image to a Grayscale 256 level image.

-> **COLOR 16**

Convert the current image to a 16 color image.

-> **COLOR 256**

Convert the current image to a 256 color image.

-> 16,7M COLOR

Convert the current image to a 16,7M color image.

Select All

Select the whole image.

UnSelect All

Discard the current selection

Invert Selection

Invert the current selection

Hide Selection

Hide or show the current selection

Draw Frame

Draw a frame around the current selection using the foreground color and the current pen size

Fill inside

Fill the current selection using the foreground color and the current brush style

Rescale Dialog

Change the size of the current image.

You can give a new width and a new height or you can give a vertical and horizontal ratio. If the "Preserve aspect ratio" checkbox is selected, width/height ratio will stay unchanged.

Zoom Dialog

Type the new zoom factor for the current window

JPEG Options

You can specify a quality factor that will be use when QV creates a JPEG file. The quality value is expressed on a 1..100 scale. Decreasing the quality will result in smaller files.

If you choose to optimize file size, saving a JPEG file will be slightly slower, but the resulting file will be smaller without any additionnal loss for the image.

You can ask QV to create Progressive JPEG files. Progressive JPEG rearranges the stored data into a series of scans of increasing quality. In situations where a JPEG file is transmitted across a slow communications link, a decoder can generate a low-quality image very quickly from the first scan, then gradually improve the displayed quality as more scans are received. The final image after all scans are complete is identical to that of a regular (sequential) JPEG file of the same quality setting. Progressive JPEG files are often slightly smaller than equivalent sequential JPEG files, but the possibility of incremental display is the main reason for using progressive JPEG

You can specify the way the chrominance components will be subsampled. For example, a subsampling of 2x2 means that you'll have one red component and one blue component for each group of 2x2 luminance components.

GIF Options

You may ask QV to interlace GIF files when it creates a GIF image.

TIFF Options

Choose the default compression algorithm used to compress TIFF file. You can specify other algorithms for black & white images or 24 bit color images.

How To Register

If you enjoy the product, order it now !

You will receive your official registration key, and you will be able to continue to use QV legally.

You may also order this other products:

- QV/JPEG, a DLL for Windows 3.x that does JPEG coding/decoding
- QV/GIF, a DLL for Windows 3.x that does GIF coding/decoding
- QV/DLL a Windows 95/NT DLL that does GIF/JPEG/TIFF and BMP coding/decoding

QV/OCX, a Windows 95/NT OCX to display GIF/JPEG/TIFF and BMP files will be released soon !

You can print or copy this order form:

Add Image Files

Allows you to select several files that will be included in the current Album

Scan Directory

Allows you to add all the images in a given directory to the current album

Scan Directory

Allows you to add all the images in a given directory to the current album.
You can check the box to scan also the sub-directories.

Edit Album Properties

View and Modify properties for the current Album:

- Album Description
- Thumbnails size
- JPEG Quality used to store thumbnails. . The quality value is expressed on the 0..100 scale, but value below 25 are'nt allowed. Decreasing the quality will result in smaller Album files.

Edit Album Properties

View and Modify properties for the current Album:

- Album Description
- Thumbnails size
- JPEG Quality used to store thumbnails. . The quality value is expressed on the 1..100 scale. Decreasing the quality will result in smaller Album files.

How to use Albums

What is an Album ?

Albums are a powerful way to manage a lot of bitmap images. An album contains thumbnails (reduced images) and links between thumbnails and the images files referenced in your album.

How to create an Album ?

Select 'New' on the file menu and select 'ALBUM' to create an empty album document.

How to add image files in an Album ?

You can

- Use the 'Add Image Files' item in the Edit Menu.
- Use the 'Scan' item in the Edit Menu.
- Drop image files into the Album using the Window Drag & Drop feature

How to change Album properties ?

Use the 'Edit Album Properties' item in the Edit Menu.

The right-click feature

Click on a thumbnail using the right button. You see a Popup-Menu which allows you to perform several operations on the thumbnail: Opening the full-scale image, moving, copying or deleting the associated image file.

Cut, Copy and Paste between Albums

Click on a thumbnail using the right button to select or unselect a thumbnail. A selected thumbnail will have a red frame around it.

You can use the Cut, Copy and Paste fonctionnalités in order to delete, copy or move thumbnails between different album documents.

Pen Tool

Select the Pen tool

Pen size is always 1 pixel. If you need something bigger, use the brush tool.

Use the left button of the mouse to draw using the foreground color.

Use the right button of the mouse to draw using the background color.

Brush Tool

Select the Brush tool

Use the left button of the mouse to draw using the foreground color.
Use the right button of the mouse to draw using the background color.

Select Tool

Select the Select tool

Allows to select an area in the current image that you may cut or paste.

Zoom Tool

Select the Zoom tool.

Select an Area to zoom in the active image using the left button of the mouse.

Use the right button of the mouse to zoom out.

Erase Tool

Select the Erase tool

Use the left button of the mouse to erase using the background color.
Use the right button of the mouse to erase using the foreground color.

Rectangle Tool

Select the Rectangle tool

Allows to draw a rectangle.

Use the left button of the mouse to draw using the foreground color.
Use the right button of the mouse to draw using the background color.
You can select Pen style and size in the drawing attributes palette.

Filled Rectangle Tool

Select the Filled Rectangle tool

Allows to draw a filled rectangle.

Use the left button of the mouse to draw using the foreground color. The rectangle will be filled with the background color.

Use the right button of the mouse to draw using the background color. The rectangle will be filled with the foreground color.

You can select Pen style and size for the border in the drawing attributes palette.

You can select a pattern used to fill the shape in the drawing attributes palette.

Frame Tool

Select the Frame tool

Allows to draw a frame. A frame is a rectangle with rounded corners.

Use the left button of the mouse to draw using the foreground color.
Use the right button of the mouse to draw using the background color.
You can select Pen style and size in the drawing attributes palette.

Filled Frame Tool

Select the Filled Frame tool

Allows to draw a filled frame. A frame is a rectangle with rounded corners.

Use the left button of the mouse to draw using the foreground color. The frame will be filled with the background color.

Use the right button of the mouse to draw using the background color. The frame will be filled with the foreground color.

You can select Pen style and size for the border in the drawing attributes palette.

You can select a pattern used to fill the shape in the drawing attributes palette.

Oval Tool

Select the Oval tool

Allows to draw an oval.

Use the left button of the mouse to draw using the foreground color.
Use the right button of the mouse to draw using the background color.
You can select Pen style and size in the drawing attributes palette.

Filled Oval Tool

Select the Filled Oval tool

Allows to draw a filled oval.

Use the left button of the mouse to draw using the foreground color. The oval will be filled with the background color.

Use the right button of the mouse to draw using the background color. The oval will be filled with the foreground color.

You can select Pen style and size for the border in the drawing attributes palette.

You can select a pattern used to fill the shape in the drawing attributes palette.

AirBrush Tool

Select the AirBrush tool

Use the left button of the mouse to draw using the foreground color.
Use the right button of the mouse to draw using the background color.

Text Tool

Select the Text tool

Enter your text and move it somewhere on your image. Use the Ctrl key and move the mouse to resize the bounding rectangle for the text.

Eye drop Tool

Select the Eye Drop tool

Click somewhere on your image to modify the current color.

Left button modifies the foreground color

Right button modifies the background color

Select Region Tool

Select the 'Select Region' tool

Draw freely the selection on the image. Double-click to end the selection.

If Shift is pressed this selection is added to the current selection.

If Ctrl is pressed this selection is removed from to the current selection.

Select Ellipse Tool

Select the 'Select Ellipse' tool
