RUN   HELP

To add or edit an icon on the menu simply point the mouse pointer to the position you want and hit the right mouse button. The edit screen will have   several fields that you should fill in:

- Description   = short description to display as you drag the pointer over the icon.
- Working drive = single letter for drive (blank = default drive)
- Command   = the command to execute when chosen   (can browse)
- Icon   = what icon to display on the menu bar (can browse)
- Working dir.   = directory to use as working directory

The shareware version is limited to 15 icons on each menu bar. The registered version will hold 30.

Other products available or soon to be released:

- EXPERT TREE   Info. Mgt. System, fun, fast, easy way to manage all your information even if it is un-related. From phone numbers, to patterns, to business meeting notes. The GUI tree structure enables you to move quick and easy thru the topics, subtopics, and sub-subtopics to just the piece of information you are looking for.

- CALC TAPE   Not your normal calculator. This one has a tape that can also   include notations for each number, can be saved and restored in a file (unlimited number of files), you can edit any entry   on the tape, and last but not least, print it. This can even keep you check book history on one of the tapes.

- PHONE SUPPORT   If your company does phone support, (computer related or   not) this is a must. It maintains customer records, product records,   support person records, trouble/solution records, call records,   and best of all... will give you quick and easy access to all   this information.
- SQL EXECUTOR   Many databases can be accessed, Dbase, Foxpro, Informix, any   ODBC database, MS-Access. Query, print, save query, view and modify the table structures. Add and modify data in the tables.
