

Super Arj Version 3.0!

Contents

Introduction

Welcome to Super Arj. Super Arj is a compression shell for the popular compression program Arj. It has many features, including drag and drop from file manager and automatic listing of archives. It requires VBRUN300.DLL, available all over the many Compuserve forums.

What's New In Version 3.0:

Total Interface Lift

(The interface has been redone)

Better Documentation

(This Help File)

Association from file manager

(Automatic listing when you double click on an arj file in File Manager.)

Removal of the 10 usage limit

(You may run the program as many times as you wish!)

Heading

Registration:

The cost for Super Arj is \$15.00.

You may register on the SWREG forum on Compuserve. Search for Registration ID #6570. You may also register by sending \$15.00 to:

Programmer's Central

161 Lost Tree

Springfield, Illinois 62704.

Super Arj Help File:

Super Arj Documentation:

This document explains the basics of using Super Arj.

Main Screen:

Archive Name: The name of the Archive you want to work with.

Select Archive Button: Select An Archive

Pop up Toolbar: Click on this to pop up a toolbar to set options.

Drag and Drop: Drag files from file manager onto the icon of Super ARJ or onto Super ARJ itself and they will be added to the listbox. Any files in the list will be compressed.

The Text Box: Enter the files that you want to compress (with full path) into this text box. These files will be compressed in addition to the ones in the list box.

The operations: Select what operation you want to perform, list files in the archive, compress files in the two boxes, remove a file from the archive, (you specify that file in the remove file form, click on the popup toolbar window and then click on the remove button), or extract the files in the archive.

The GO button: Start the selected operation.

Extract from archive window:

The Extract To Box: Type in the directory to extract to

The Pause Area: Select whether or not you would like to

The Close command: Go back to the toolbar window

Compression Window:

Select what type of compression you would like to use. The higher level of compression, the longer it takes to compress the files.

The Remove Window:

Type the name of the file that you would like to remove from the archive.

The add to archive window:

The Verification Area: Select whether or not you would like verification.

Status indicators: Select what type of status indicator you would like.

The Backup Area: Select what files to compress, the files on or after the specified date, all files, before the specified date, or the files no older than X many days.

The Price for Super Arj is \$15.00.

If you have any further questions, E-Mail me at 76767,1213.

Thank you for your feedback!

Catalog of other Programmer's Central Products:

How to use this guide:

At the very end, there are some Mega-Packs of lots of programs and their prices, descriptions, and Identification Codes. These programs are fully functional, registered versions, and very well put together. IF you can find a bug in the program itself (not having to do with your system's limitations or you not setting up the program correctly), it's FREE! Us here at Programmer's Central are dedicated to making your life easier through computers. Our apps are rock solid and WILL NOT CRASH! or it's FREE! (Like I said, as long as it's our fault :)

Quote Master - C9QUOTE

Cost \$10.00

This program comes with 20 quotes and a search engine. You can search for any quote having to do with a particular topic. You may also add your own quotes.
