

Microsoft® Index Server

**Document Search Services for
Windows NT**

Query Features

- Search for words and phrases within document contents and textual properties (including Office Custom properties).
- Property value queries (<, <=, =, =>, >, !=).
- Boolean operators (*AND*, *OR*, *NEAR*, *NOT*).
- Limit queries by scope.
- Respect Windows NT security.
- Return documents and specific property data.

Index Features

- Index full text in Web pages.
- Index full text in formatted documents such as Word and Excel objects.
- Incrementally refresh indexes.
- Control indexing on a virtual directory basis.
- Index property values.
- Autogenerate document abstracts.
