

Welcome to the PeerGuardian 2.0 beta!

If you think things are missing, you're right- This is a work in progress. Your input at the Methlabs forums will help us shape PeerGuardian into the best solution there is for protecting your privacy on P2P.

Platform Support

PeerGuardian 2 currently supports Windows 98, ME, 2000, XP, and 2003 in 32-bit and 64-bit.

Source Code

PeerGuardian 2 is available freely under a zlib License (license.txt). Please make sure you understand it well before messing with the included source. Though not required, we would love to hear from you at the Methlabs forums if you use it.
