Euro 9,71

Description:

CS-Convert has two main functionalities. It converts special characters like "ü","ä","©", etc. to the matching HTML-Code and the other way round. But moreover it converts "ü", "ß", etc. to "eMail"-Style, that means "ue", "ss", etc. In addition you may use user defined convertions. The text to be converted you may load, save and edit. At least the software converts all special characters to HTML and CHR. You are able to select special characters from a list, instantly ready for use.
