

This reference system describes the purpose, ways of setup and operation of the Control Center. You will come across the following text marks and symbols:

bold

The window banners, program names, file names, etc.

When you click on this button the program will open a standard **Folders review** window in which you can select the update folder.

Warning!

Notes and important information.

When you have found the first line (or its part) matching the search criteria...

- Point 1
- Point 2

Enumeration.

- Menu
- Tool bar

{button ,PI('','IDH_FEEDBACK')} [Contact us](#)

You can organize your filters list, using its dynamic menu elements.

- **New filter** — add new filter
- **Delete** — delete a filter
- **Properties** — edit the selected filter properties

{button ,PI(';', 'IDH_FEEDBACK')} [Contact us](#)

If you have any suggestions on improvement of this reference system, please, contact [Kaspersky Lab.:](mailto:Kaspersky_Lab.support@avp.ru)
[support@avp.ru](mailto:Kaspersky_Lab.support@avp.ru).

In the left part of the main report generator you will see the *filter list*. Depending on which filter you have selected in the list, the report table will show the full or filtered by some condition report with the task job results.

{button ,PI('`,`IDH_FEEDBACK')} [Contact us](#)

When you add or edit filters in the New filter dialog window or Change filter window respectively, you can change the following filter properties:

- **Filter name** — filter name
- **Conditions** — list of conditions, which will be applied to select the lines of the full report. To organize the conditions list use

respectively in order to add, delete or edit the condition

- **Apply filter** — **To all of report file** or **Only to this session**

{button ,PI('`,`IDH_FEEDBACK')} [Contact us](#)

To search the report for information use the **Find in report** dialog window. This window appears when you click **Find** in the **Edit** menu or click  in the toll bar, or press **<Ctrl>+<F>**.

To find a line (or its part), enter it in the **String to find** line, then set the required search parameters and click **OK**.

Let's explain the search settings:

- § Match whole word only — find in report all words that match the specified sample
- § Match case — consider the letter case
- § Match whole string — search for report lines, which match the pattern

To close the window, click **Cancel**, and to get help, click **Help**.

After you have found the first line (or its part) matching the search pattern, you can find the rest of strings (or sub-lines). To do so, click

, or select the **Find next** command in the **Edit** menu, or press **<F3>**.

E-mail: support@avp.ru.

When you add or edit the filter conditions in the **New condition** window or in the **Condition properties** respectively, you specify the limitations on the report table columns contents.

- The **Field** list is used to select the column name
- The **Condition** opening list is used to select the imposed condition type
- The **Value** list contains the condition limit value
- If you click **OK** you will exit the dialog window and save the modifications, and if you click **Cancel**—no changes will be saved

{button ,PI(','IDH_FEEDBACK')} [Contact us](#)

Report Viewer is activated when you click **Report** in the **Finish** window of the AVP update program, or when you click **Report** in AVP Control Center.

{button ,PI('`,`IDH_FEEDBACK')} [Contact us](#)

To clear the report, select **Clear report** in the **Report** window or click  in the tool bar.

{button ,PI(';',IDH_FEEDBACK')} [Contact us](#)

To review the report saved in a file, select the **Open** item in the **Report** menu. In the displayed Open **report** window select the report file and click **Open**.

{button ,PI('`,`IDH_FEEDBACK')} [Contact us](#)

To save the report in a file, select the **Save as** item in the **Report** menu or click  in the Task Bar. In the opened **Save as** window enter the file name and click **Save**.

{button ,PI(';',IDH_FEEDBACK')} [Contact us](#)

To review the full report, select the **Full report** line in the filter list.

To view the report filtered by some condition, select the needed filter in the filter list.

{button ,PI('`,`IDH_FEEDBACK')} [Contact us](#)

To the right of the report contents you can see the Tool Bar, which contains buttons for operation execution. The buttons have the pop-up prompts. To get them, point the mouse cursor to a button then, next to it you will see a small window with a short help line.

On the top you will see the main menu. We should note, that the Task Bar buttons and some menu commands duplicate each other.

Below there is the comparative table of the buttons and menu commands correspondence. We will explain their purposes.

Task Bar	Menu	Description
	View\Over other windows	Locates an application window over all other program windows on the desktop.
	View\Monitor the report	Report monitoring (if you enable this option, the report will automatically be positioned on the bottom line, when the new data come).
	View\Show previous session	Shows the last session report
	View\Refresh	Repeats the last report download from the file
	Edit\Find	Finds a line and its part in the report. If you click this button, you will see a search window
	Edit\Find next	Finds the next line (or its part), which matches the search pattern
	File\Save as...	Saves the report in the file with a different name
	File\Clear report	Clears the report file

Report Viewer—is used for management and review of reports, which are developed by the Kaspersky Antivirus package components. In this product version the Report Viewer handles the reports developed by the updating utility.
