Thank you for downloading Shadow Plan!

Shadow Plan (affectionately called "Shadow") is a checklist, task manager and hierarchical note taker.

You might say to yourself, "What, another one?!".

We might respond "Yes. This one is fast, lean, and above all .. useful.". Shadow Plan does not aim to have all the features of all the other tools available. It instead aims to have the tools you need to get the job done .. to organize yourself. So we aim for those features people ask for and people use. Nothing cute. Nothing fancy. But all good.

And, because we dislike the way things are going in other Palm applications, we sell Shadow Plan cheap. We thought you'd like that.

Feel free to email the author, and be sure to get a response. New features will be added weekly.. not yearly. Rest assurred Shadow Plan is under aggressive development.

See the WhatsNew.txt for recent additions, the Reference Guide for a comprehensive manual, and the FAQ for any extra questions you may have.

Included is the application and a simple manual. A better manual is on its way, including reference guide and example recipes and how-to's. Be pateitn with us on our first release!

Head over to http://www.icomm.ca/~skeezix/palm for updates, more details, screenshots and support.

Shadow Plan is a community tool. If you wish to participate and make feature requests, join a mailing list. If you are living with a disability, let us know and youuo can get a discounted price. Give us your feedback. We're all ears.

Above all, enjoy the software.

        Jeff Mitchell
