Area Object

The **Area** Object represents an area in a report. An area is a group of like sections in the report (i.e., Details A - Da, Details B - Db, etc.) that all share the same characteristics. Each section within the area can be formatted differently. This object allows you to retrieve information and set options for a specified area in your report.

Properties

Application - Returns a reference to the **Application** Object this object is associated with. Read only.

CopiesToPrint - Returns/Sets the number of copies of each item in the Details section of the report. For example, by default, each line of the Details section only prints once. By setting this to 3, each line of the Details section would print 3 times. Read/Write.

GroupNumber - If the area is a group, this returns the group number. Otherwise, exception is thrown. Read only.

GroupOptions - Returns **GroupAreaOptions** Object which provides properties/methods for getting and setting group options. Exception is thrown if area is not a group area. Read only.

Kind - Returns CRAreaKind (see table below) which specifies what "kind" of area (i.e., Details, Report Header, Page Footer, etc.). Read only.

crDetail	4
crGroupFooter	5
crGroupHeader	3
crPageFooter	7
crPageHeader	2
crReportFooter	8
crReportHeader	1

Options - Returns **AreaOptions** Object which provides properties for getting and setting area options (i.e., new page before, keep together, etc.). Read only.

Parent - Reference to the Parent object (**Area** Object). Read only.

Report - Reference to Report Object. Read only.

Sections - Returns **Sections** Collection which specifies a collection of all the sections in the area. Read only.
