

FieldObject Object

The **FieldObject** Object represents a field found in a report (i.e., special field, database field, parameter field, etc.). This object provides properties for retrieving information for a field in your report. A FieldObject Object is obtained from the Item property of the **ReportOptions** Object (i.e., ReportObjects.Item(Index)), where the index references a special field, database field, parameter field, summary field, or group name field (except BLOB field - see **BlobFieldObject** Object).
