

PrintOut Method (Report Object)

The **PrintOut** method prints out the specified pages of the report to the printer selected using the **SelectPrinter** method. If no printer is selected, the default printer specified in the report will be used.

Syntax

```
object.PrintOut PromptUser, NumberOfCopies, Collated,  
StartPageNumber, StopPageNumber
```

Parameters

PromptUser (Optional) - Specifies Boolean value indicating if the user should be prompted for printer options.

NumberOfCopies (Optional) - Specifies the number of report copies you want printed.

Collated (Optional) - Specifies Boolean value specifying whether or not you want the report copies collated.

StartPageNumber (Optional) - Specifies the first page you want printed.

StopPageNumber (Optional) - Specifies the last page you want printed.
