ZoomPreviewWindow Method (View Object)

The **ZoomPreviewWindow** method zooms the view in and out, showing the report as a percentage of the full size of the report page. Because only one view is supported, this method will apply to the main view (preview) only.

Syntax

```
object.ZoomPreviewWindow (ZoomLevel)
```

Parameters

ZoomLevel - Specifies the percentage of magnification for the view (i.e., 50%, 75%, etc.).
