

CancelButtonClicked Event (Window Object)

The **CancelButtonClicked** event occurs when the Cancel button is clicked.

Syntax

```
Event CancelButtonClicked (useDefault As Boolean)
```

Parameters

useDefault - Specifies Boolean value indicating whether the default settings should be used. Assign useDefault = FALSE if not using default behavior defined in CPEAUT (i.e., if you do not want the cancel button to cancel moving to the last page or processing the report).

Remarks

Before enabling this event, the HasCancelButton property of the **PrintWindowOptions** Object must be set to TRUE. This event is enabled using the PrintWindowButtonEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
