ClosePrintWindow Event (Window Object)

The **ClosePrintWindow** event occurs when the print window is closed.

Syntax

```
Event ClosePrintWindow (useDefault As Boolean)
```

Parameters

useDefault - Specifies Boolean value indicating whether the default settings should be used. Assign useDefault = FALSE if not using default behavior defined in CPEAUT (i.e., if you do not want the print window to close).

Remarks

This event is enabled using the ClosePrintWindowEventEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
