

DrillOnGroup Event (Window Object)

The **DrillOnGroup** event occurs when drilling down (double-clicking) on a group field in the preview window.

Syntax

```
Event DrillOnGroup (GroupNameList, DrillType As CRDrillType,  
useDefault As Boolean)
```

Parameters

GroupNameList - Specifies an array indicating the path to the group that was drilled down on (separated by "/").

DrillType - Specifies CRDrillType (see table below) indicating what type of drill down occurred.

crDrillOnGraph	2
crDrillOnGroup	0
crDrillOnGroupTree	1

useDefault - Specifies Boolean value indicating whether the default settings be used. Assign useDefault = FALSE if not using default behavior defined in CPEAUT (i.e., if you do not want drill down to occur).

ReportName - Reserved for future use.

Remarks

Before enabling this event, the CanDrillDown property of the **PrintWindowOptions** Object must be set to TRUE. This event is enabled using the GroupEventEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
