

ExportButtonClicked Event (Window Object)

The **ExportButtonClicked** event occurs when the Export button is clicked.

Syntax

```
Event ExportButtonClicked (useDefault As Boolean)
```

Parameters

useDefault - Specifies Boolean value indicating whether the default settings should be used. Assign useDefault = FALSE if not using default behavior defined in CPEAUT (i.e., if you do not want the Export dialog box to appear).

Remarks

Before enabling this event, the HasExportButton property of the **PrintWindowOptions** Object must be set to TRUE. This event is enabled using the PrintWindowButtonEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
