

## LastPageButtonClicked Event (Window Object)

The **LastPageButtonClicked** event occurs when the button which navigates through the report to the last page is clicked.

### Syntax

```
Event LastPageButtonClicked (useDefault As Boolean)
```

### Parameters

**useDefault** - Specifies Boolean value indicating whether the default settings should be used. Assign useDefault = FALSE if not using default behavior defined in CPEAUT (i.e., if you do not want to go to the last page).

### Remarks

Before enabling this event, the HasNavigationControls property of the **PrintWindowOptions** Object must be set to TRUE. This event is enabled using the PrintWindowButtonEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
