NextPageButtonClicked Event (Window Object)

The **NextPageButtonClicked** event occurs when the button which navigates through the report to the next page is clicked.

Syntax

```
Event NextPageButtonClicked (useDefault As Boolean)
```

Parameters

useDefault - Specifies Boolean value indicating whether the default values should be used. Assign useDefault = FALSE if not using default behavior defined in CPEAUT (i.e., if you do no want to go to the next page).

Remarks

Before enabling this event, the HasNavigationControls property of the **PrintWindowOptions** Object must be set to TRUE. This event is enabled using the PrintWindowButtonEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
