

Stop Event (Report Object)

The **Stop** event that occurs when report stops printing/previewing.

Syntax

```
Event Stop (Destination As CRPrintingDestination,  
Status As CRPrintingProgress)
```

Parameters

Destination - Specifies CRPrintingDestination (see table below) indicating what "destination" the report will be printed to (i.e., printer, window, exported, etc.).

crFromQuery	4
crToExport	3
crToNoWhere	0
crToPrinter	2
crToWindow	1

Status - Specifies CRPrintingProgress (see table below) indicating the progress of the report print job (i.e., in progress, halted, cancelled, etc.)

crPrintingCancelled	5
crPrintingCompleted	3
crPrintingFailed	4
crPrintingHalted	6
crPrintingInProgress	2
crPrintingNotStarted	1

Remarks

This event is enabled using the StartStopEventEnabled property of the **EventInfo** Object obtained through the EventInfo property of the **Report** Object.
