MICROSOFT SYSTEM INFORMATION EXTENSIONS

Microsoft System Information uses a set of controls to collect and display information on Win95, Windows 98, and NT 4.0. These extensions must be installed in order to open and view System Information Files created as .NFO files or Windows Report Tool .created .CAB files within the System Information MMC snap-in on Windows 2000.

Steps to use the controls:

Run the install the controls:
Start the System Information Snap-in (Start->Run->msinfo32.exe)
From the Task Menu Select Open System Information File
Select the .NFO or .CAB file that was created on Windows 9x or NT4.0.
Click Open.
The file should open and the saved information should be displayed.
